HOW TO ORDER BY MAIL

Prices in This Catalogue Cancel All Previous Prices and Are Subject to Change Without Notice.

YOUR NAME AND ADDRESS.—Be sure that your name and address are written very plainly on each order. We frequently have orders where either name is not given or address omitted. Also give plainly the R. F. D. number and box or street address. We acknowledge all orders above 25 cents by Post Card, giving the number of your particular order. If such acknowledgement is not received, or if the order does not follow at once, write us about it.

CASH WITH ORDER.—The proper way is to send remittance in full to cover order and postage. Remittance should be made by Post Office Money Order or Express Money Order. For amounts up to \$1.00 clean unused Postage Stamps will be accepted. Checks on Phoenix banks may be sent, which will be a great convenience to many customers. We do not accept responsibility for orders which never reach us.

SHIPPING.—We will use our best judgment as to the best way of sending orders when specific directions are not given. On large orders it is better to have them go by express or freight if your town is on a railroad. If special directions in shipping are needed, send them explicitly, and where express or freight office is different from post office so state in space on our order sheet. Paris Green, London Purple and other poisons are not mailable, nor are liquids like Black Leaf 40 and other insecticides; they must go by express or freight. Seeds do not pack well with nursery stock, they may get damp and become spoiled; it is therefore better to have them shipped separately.

POSTAL RATES.—Rates of Postage on Books, Seeds, Bulbs, Plants, Roots, etc., 8 oz. or less, 1c for each 2 oz.; all over 8. oz., Parcel Post rates.
WEIGHT LIMIT: First, second and third zones, 70 pounds; over third zone, 50 pounds.

1st zone Up to 50 miles from Phoenix	2nd zone 50 to 150 mi. from Phoenix	3d zone 150 to 300 mi. from Phoenix	4th zone 300 to 600 mi. from Phoenix	5th zone 600 to 1000 mi. from Phoenix	6th zone 1000 to 1400 mi. from Phoenix

SEEDS BY MAIL.—On orders for vegetable and flower seeds except Beans, Corn and Peas we pay postage within the 4th zone limit, but we do not pay postage charges on Onion Sets, Field Seeds, Clovers, Grasses, Bird Seeds, Beans, Corn, Peas, Tools, Plants or Bulbs, *except where the price reads postpaid.* We do not ship plants C. O. D.

We Do Not Warrant Seeds—The fact that no reputable seedsman now warrants seeds in any respect being well known, renders it unnecessary for us to say very much on this point, as it must be apparent to every intelligent person that no seedsman can afford to send out poor or worthless seeds. There could be no more certain way of destroying his business. We beg to append the following notice:

The seeds offered in this Catalogue have been carefully grown, selected, cleaned and tested for germination, and we believe them to be first-class in every respect, but we cannot guarantee the crop, as too many conditions enter into it: therefore, we give no warranty, express or implied, as to description, purity, productiveness or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once, and if the money has been paid for them it will be refunded.

Arizona Seed & Floral Company,

BUY THE BEST—WE DO

ARIZONA SEED & FLORAL CO., PHOENIX, ARIZONA

TO OUR PATRONS:

It is with pleasure that we present our seventeenth annual descriptive catalogue. Our old friends we greet as "Old Friends." To new customers we extend this friendly greeting.

It has been our aim to compile herein the kind and character of information about seed, flowers, plants and vegetables that will helpfully guide both the amateur gardener and the veteran farmer toward the most prolific results for their investment and effort.

We take pardonable pride in the fact that we can unqualifiedly recommend all of our seeds as being of the highest and most dependable quality. The seeds of every type described in this booklet have been grown and selected by the most reliable seed producers in the world, and in sections especially adapted to raising seeds of the healthiest and most productive character.

We sincerely hope that we will receive your kind inquiries and orders, and we shall put forth our best endeavors to merit a continuance of your favors.

Yours very truly,

ARIZONA SEED & FLORAL COMPANY
CLYDE D. CROPPER, *President and Manager.*

description

VIEW OF THE SEED AND BULB DEPARTMENT

In the department pictured above we carry seeds and bulbs of practically every type of flower, vegetable and shrub that will thrive in this part of the country. All have been most carefully selected from the healthiest stocks, and with proper planting and care, will produce the best results.

VIEW OF FLORAL ACCESSORY AND PET SUPPLY DEPARTMENTS

In this department pictured above, you will find a colorful and artistic array of Flower Bowls, Vases, Holders, Baskets, Jardinières and Art Pottery designed to create effective settings for flowers of every kind. We carry a complete list of all accessories for the housing, care and feeding of Birds, Gold Fish and Dogs, together with the most approved remedies for their various ailments.

BUY THE BEST—WE DO

SOMETHING WORTH THINKING ABOUT

TESTED AND RELIABLE SEEDS

When you buy seeds you buy a product, the quality of which you can tell nothing about by looking at it—it is a matter of buying the reputation of the seedman you make the purchases from.

You may buy a packet of Zinnia seed from us and have wonderful blooms, and your neighbor may go to the grocery and buy a packet of the same variety and never a seed come up, yet the soil, climate, and all conditions are the same; and to hold the two different lots of seed in your hand you could not tell one from the other.

So it is up to your seedman; if he is reliable he will furnish you the best seed obtainable and before it is sold to you the seed will be tested to prove that it is worth your planting.

So buy the reputation of your seedsmen—look him up before purchasing—then you are sure of what you are buying.

For the past seventeen years we have furnished our customers with seed of the highest type and germination; seeds of the highest quality—insuring their growth, and we know that the increase in our volume of business and number of customers each year is due to the fact we furnish only the best seed.

To our many customers we feel that we owe our entire success, and to show our appreciation of your patronage we can think of no better plan than to continue to furnish you with seeds that you can depend upon.

Write us about your Garden and Farm problems as we are anxious to serve you and hope to have your orders for seed during 1928.

OUR SPECIALTY IS SEED IN BULK

Every home maker should have a garden, even though small. Much can be produced, and greatly enjoyed at the family table. Be sure to include Stringless Green Pod Beans, Kentucky Wonder Pole Beans, Extra Early Adams or Golden Bantam Sweet Corn, Detroit Dark Red Beets, Arizona Davis Perfect Cucumber, Swiss Chard, Chantenay Carrots, New York Market Head Lettuce, and Icicle Radish.

In the flower garden do not overlook trying some of our Wonderful Giant Double Dahlia Flowered Zinnias. You will not be disappointed.

A satisfied customer is our best advertisement, and to carry out this precept we aim to send this catalogue only to localities where we know satisfactory results will be produced.

Compared with many seed books our catalogue is conservative, yet you will find listed herein practically every variety of seeds, bulbs, and plants, for which there is a demand. Aside from listing the most improved varieties of garden and flower seeds, this book gives such cultural directions as will aid the small city gardener to make an intelligent selection.

TESTED SEEDS

We have a practical testing system and thus know the germination and purity of each variety we offer. We also procure the pedigree of each variety as far as possible. If any of our seeds, bulbs, poultry supplies, or other goods are not as we represent them, we will consider that you are doing us a favor by telling us about it.

ABOUT PRICE

When you get seeds from us you get the best that can be produced and at a price that is based upon the actual value of the product from which the seed is selected. Too cheap seed indicates that seed was taken from an inferior product. Here is an illustration: Thousands of pounds of seed from cull tomatoes, cucumbers, peppers, watermelons, and cantaloupes are saved each year by canneries, and some who call themselves seedmen sell them to dealers and planters. There is no wonder they can sell them at a low price. They are cut from culls which would not do for market and would otherwise be worthless except for canning. These so-called seedmen do not tell the planter they are cull seed, but it is like saving the poorest corn for seed because it will not sell, or the poorest cattle for breeding purposes because they are not good enough to fatten for the market.

SAVE MONEY

See pages 41-42 and 83 for Bargain Seed Packet Collections of garden and flower seeds. Whenever you have use for quantities larger than the sealed 5c and 10c packets consult our schedule of prices for larger quantities. Perhaps you can buy for your neighbor as well as yourself by dividing the bulk after you receive the seed. Where seeds are priced 10c for one ounce we do not sell half-ounces. If price for one ounce is 15c we give one-half ounce for 10c.

If any seeds do not prove as represented by us we will replace with more or other seeds to same value.

Yours very truly,

ARIZONA SEED & FLORAL COMPANY

(PLANT OUR GIANT ZINNIAS
—See pages 50 and 51)

LETTUCE-NEW YORK SPECIAL

NEW YORK LETTUCE is, without question, the leading head lettuce on the market today and the Salt River Valley section is already famous for the quality of New York Lettuce, of which thousands of carloads are distributed to Eastern markets each season.

OUR STRAIN of NEW YORK LETTUCE seed is conceded, by the many growers who use it, as the best procurable. It is kept pure by constant upbreeding for trueness to type and all seed fields are thoroughly and intelligently rogued by experts, thereby eliminating any off types which might appear.

DO NOT PLANT "inferior cheap seed." When seed is scarce and high priced it is always a temptation to solicitors, peddlers and some dealers, not posted on good lettuce seed, to offer inferior seed at bargain prices. Cheap seed, in most cases, proves to be the most expensive. We make a specialty of high class lettuce seed and claim quality **ONLY**. Use only old seed for early planting. For this reason we always carry a large stock of seed over every year to assure our customers of a supply of one-year-old seed, which has been tested for purity and will germinate evenly and yield a good crop.

NEW YORK SPECIAL LETTUCE.....(Pkt. 10c), (oz. 30c), ($\frac{1}{4}$ lb. 35c), (1 lb. \$2.50), postpaid.

(Ask for special prices on large quantities)

WE WILL GLADLY MAIL OUR CATALOG TO ANY OF YOUR FRIENDS AND NEIGHBORS WHO ARE INTERESTED IN GARDENING.

ASPARAGUS—Esparrago

Use one ounce to 60 ft. of row, 5 lbs. to the acre.

CULTURAL DIRECTIONS

Sow during February and March in beds broadcasted or in rows, covering about one inch. A light straw mulch on the surface will prevent soil from crusting. Seed should be soaked 24 hours before sowing. The following January or February transplant to rows three or four feet apart and one foot apart in the rows, with at

least six inches of soil over the roots; light loamy soil is preferable. Much time and labor will be saved by planting two-year-old roots. See page 24.

MARY WASHINGTON—Rust resisting and very early. Seed, (Pkt. 10c), (oz. 45c), (¼ lb. \$1.50), (1 lb. \$4.50), postpaid.

PALMETTO—A popular variety for home gardening. Seed, (Pkt. 10c), (oz. 20c), (¼ lb. 45c), (1 lb. \$1.25), postpaid.

ARTICHOKE—Alcachofa

GREEN GLOBE—Grown for the undeveloped flower heads, which are cooked like asparagus. When once planted it lasts several years. Seed

should be sown in frames and plants transplanted to the open when large enough.

Seed, (Pkt. 10c), (oz. 90c), (¼ lb. \$3.00), postpaid.

BEANS—Frijole

WRITE FOR QUANTITY PRICES

CULTURAL DIRECTIONS

Beans require well drained loamy soil and frequent cultivation. Use manure sparingly as it has a tendency to run the plants to too much vine. Irrigate beans only when necessary and do not flood the vines. Cultivate before the soil has a chance to crust. For a Spring crop plant in late February, March and early April. For Fall crop plant in August and early September. Bush beans should be planted about three inches apart in three-foot rows at the rate of one lb. to 80 ft. of row and from 75 to 100 lbs. per acre. Plant pole beans at the rate of one lb. to 200 ft. of row or 40 lbs. to the acre. We list herein only varieties that are strictly adapted to our climatic conditions. For mildew on beans use powdered sulphur. (See page 74 for Insecticides).

BUSH VARIETIES

IMPROVED STRINGLESS GREEN POD

—This is by far the leading green pod variety, possessing the invaluable quality of bearing pods without strings or threads. Our stock is particularly adapted to Arizona conditions and is a wonderful producer.

(Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

BLACK WAX—A very popular variety for the home garden, being one of the earliest and bearing round meaty pods of deep golden yellow. It is almost entirely stringless and carries the excellent flavor for which all wax beans are noted. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

IMPROVED GOLDEN WAX—Although this is not the earliest dwarf bean it is a sure and heavy cropper. The quality is good, it being entirely without strings or fibres at all stages until maturity. Pods are of rich golden yellow.

(Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

LIMA BEANS

BURPEE'S BUSH LIMA—Large seeded and very early maturing. (Pkt. 10c), (½ lb. 20c), (lb. 35c), (10 lbs. \$3.00), postpaid.

LARGE LIMA—A pole variety, large seeded, bearing usually three to four beans in a pod. (Pkt. 10c), (lb. 35c), (10 lbs. \$3.00), postpaid.

IF YOU ARE A MARKET GARDENER, SEND US YOUR LIST AND WE WILL QUOTE YOU SPECIAL PRICES ON QUANTITIES.

IMPROVED STRINGLESS GREEN POD

POLE BEANS

Plant three to four feet apart each way.

KENTUCKY WONDER—This large green pod bean should be planted as early as possible in the Spring and again the latter part of July, and to August 15th. The Fall crop does remarkably well if staked. (Pkt. 10c), (½ lb. 20c), (lb. 35c), (10 lbs. \$3.00), postpaid.

KENTUCKY WONDER WAX—Very similar to the green pod. Prolific and of good quality. Plant during June and July in Southern climates. (Pkt. 10c), (½ lb. 20c), (lb. 35c), (10 lbs. \$3.00), postpaid.

BROAD WINDSOR—The celebrated Broad Bean of England, growing on a strong stalk two feet high; beans eaten shelled.

(Lb. 30c), (10 lbs. \$2.50), postpaid.

BUY THE BEST—WE DO

(SPRAY WITH BLACK LEAF 40—See page 74)

BEET—Betabel-o-Remolacha

CULTURE

In the small garden beets may be grown in rows 12 inches apart, in the field 13 to 24 inches. They may be planted from August 1 to June 1. One ounce of seed will sow 50 feet of row and six or seven pounds are required for an acre. If the soil is in perfect condition beet seed will germinate readily, but they should not be planted in wet, soggy ground in the Winter time.

Frequent cultivation is necessary for rapid and tender growth. While it is true beets will endure considerable drouth and neglect, growing under these conditions they become woody and ill shaped, particularly in our heavy adobe soil. Keep them well cultivated and they will produce table size beets in 65 to 70 days.

BEET — ECLIPSE

ECLIPSE—Not quite as early as the Egyptian. It is nearly round and has a small top. The flesh is of a bright red color, very fine grained, tender and sweet. (Pkt. 5c), (oz. 15c), (¼ lb. 35c), (lb. \$1.00), postpaid.

CROSBY'S EGYPTIAN—A medium sized beet, very early and of small top. It is a globe variety of deep crimson, sweet and tender. We recommend it highly for market gardeners or home garden. (Pkt. 5c), (oz. 15c), (¼ lb. 40c), (lb. \$1.25), postpaid.

SWIS: CHARD

BEET — CROSBY'S EGYPTIAN

EXTRA EARLY EGYPTIAN—An early dark red flat variety, which we recommend for late Spring and Summer planting, it having been thoroughly demonstrated by Salt River Valley market gardeners that it is far superior to any other for planting at this time. (Pkt. 5c), (oz. 15c), (¼ lb. 35c), (lb. \$1.00), postpaid.

EARLY BLOOD TURNIP—One of the early sorts; turnip shaped, dark red and of medium size. (Pkt. 5c), (oz. 15c), (¼ lb. 35c), (lb. \$1.00), postpaid.

DETROIT DARK RED—One of the best for home or market garden use. Medium sized, globular or nearly round, with a fine grained, dark red flesh. (Pkt. 5c), (oz. 15c), (½ lb. 40c), (lb. \$1.25), postpaid.

LONG BLOOD—A splendid variety for sandy soil, but should be avoided if soil is heavy as it is almost impossible to harvest them. Flesh is very dark red and beet long, symmetrical shape. (Pkt. 5c), (oz. 15c), (¼ lb. 35c), (lb. \$1.00), postpaid.

SWISS CHARD—A foliage beet used for greens. Cook the leaves as you do Spinach and the stems in cream like Asparagus. You will find it delicious. Excellent for green feed for poultry. It may be cut above the crown and will come again. (Pkt. 5c), (oz. 15c), (¼ lb. 35c), (lb. \$1.00), postpaid.

STOCK BEETS FOR FEEDING

STOCK BEETS have for years been recognized as a most valuable feed for hogs, sheep and cattle, throughout Europe, Canada and also the Eastern and Middle Western States of America.

Stock Beets are one of the finest fat and milk-producing crops we have today and when fed in conjunction with grain they are worth nearly as much, pound for pound, as the grain itself.

Stock Beets also furnish excellent food for chickens and rabbits.

PRODUCTION AND COSTS

The average production of Stock Beets at our trial grounds was 35 tons per acre. This is not exceptional—80 tons per acre has been reported.

CULTURE

STOCK BEET SEED should be sown about one inch deep, in well cultivated soil in drills eighteen inches to three feet apart (depending upon the method of cultivation). When the plants are sufficiently large, thin out to stand ten to twelve inches apart in the rows. The seed is generally sown at the rate of eight to ten pounds per acre. Beet Seed is very hard and does not germinate as easily as other seeds, therefore the soil should be very moist at the time the seed is planted. If the soil should be dry it is advisable to soak the seed in lukewarm water for 24 hours before planting.

MAMMOTH LONG RED—A very large mangel and a heavy cropper. Skin is red, flesh white, zoned with red. This is the most popular variety grown. (Pkt. 10c), (oz. 15c), (lb. 60c), (10 lbs. \$5.50), postpaid.

GOLDEN TANKARD—A large yellow sort growing about half out of the ground. (Pkt. 10c), (oz. 15c), (lb. 60c), (10 lbs. \$5.50), postpaid.

GIANT HALF SUGAR ROSE—We have seen specimens of this variety in the Salt River Valley weighing 45 pounds, and have heard of them weighing 70 pounds. (Pkt. 10c), (oz. 15c), (lb. 60c), (10 lbs. \$5.50), postpaid.

WHITE KLEIN WANZLEBEN—Without a doubt the best sugar beet in cultivation. Not the largest in size, but the richest in saccharine. It will fatten hogs as quickly as grain. (Pkt. 10c), (oz. 15c), (lb. 60c), (10 lbs. \$5.50), postpaid.

BROCCOLI — (Brocoli)

A vegetable like cauliflower which is grown for the sake of the head. It matures earlier, also later, and will make a surer head than cauliflower. Culture same as cauliflower.

ST. VALENTINE—Heads very compact, of creamy white (Pkt. 15c), (oz. \$1.50), (¼ lb. \$5.00), postpaid.

CACTUS BRAND—GOLDEN ACRE

STOCK BEET
Mammoth Long Red

GOLDEN ACRE CABBAGE

GOLDEN ACRE CABBAGE—Matures 80 days. An extra early selection of the Copenhagen Market type. Remarkably uniform in size and quickness of growth; is very compact, with few outer leaves, permitting close planting. Heads are extremely hard, solid and heavy. Heart is nicely blanched and of exceptional quality. It is a splendid shipper. Stem is short and the heads grow close to the ground.

(Pkt. 10c), (oz. 75c), (¼ lb. \$2.00), (1 lb. \$6.00), postpaid.

BUY THE BEST—WE DO

(For satisfactory results — use
Gromore Fertilizer. See page 75)

CABBAGE—Col-Repollo

CULTURE

Well knowing the first essential of successful Cabbage growing to be good seed, we are giving it our undivided attention and the results have been most gratifying. The seed we offer is of the most highly selected strains and will produce wonderfully tender, crisp cabbage.

In the southern valleys of Arizona seed should be sown the latter part of July and during August in shaded beds, the shade to be of burlap or something that may be removed before plants become spindling. For small heading varieties, such as Early Winningstadt and Jersey Wakefield, plant in rows three feet apart and 18 inches apart in the row. Begin transplanting as soon as plants are large enough and cultivate constantly.

One-half pound of seed should be planted to grow plants for one acre.

The illustrations appearing on these pages are from actual photographs taken of seed field specimens.

CABBAGE—EARLY WINNINGSTADT

EARLY WINNINGSTADT

One of the best for general use, being a medium sized head, very solid and of uniform shape. It is the leading variety for Southern Arizona, and our strain of seed is selected from a sure-heading type. (Pkt. 10c), (oz. 25c), (¼ lb. 80c), (lb. \$2.50), postpaid.

EARLY JERSEY WAKEFIELD

Slightly larger than the Winningstadt, heads conical shape and very compact. A good second early variety. (Pkt. 10c), (oz. 35c), (¼ lb. \$1.20), (lb. \$3.50), postpaid.

EARLY FLAT DUTCH

Very hardy, handsome, solid and of fine quality; particularly desirable for shipping to distant market. (Pkt. 10c), (oz. 30c), (¼ lb. \$1.00), (lb. \$3.00), postpaid.

RED DUTCH

Fine solid, dark red heads, used for boiling or pickling. This variety carries a flavor all its own. (Pkt. 10c), (oz. 35c), (¼ lb. \$1.20), (lb. \$3.50), postpaid.

ALL HEAD EARLY

ALL HEAD EARLY

A splendid variety of remarkable uniform size and shape, and sureheading qualities. Deep flat heads, solid and uniform in color, and in tenderness unsurpassed. By reason of its compactness one thousand more heads can be obtained from one acre than of any other good-sized varieties. (Pkt. 10c), (oz. 35c), (¼ lb. \$1.20), (lb. \$3.50), postpaid.

DANISH BALLHEAD—Cactus Brand

DANISH BALLHEAD

A medium sized very solid variety which will remain in good condition longer than most sorts. It is one of the hardiest Winter cabbages we have. Being a very strong grower, it demands a reasonably rich soil and will respond readily to fertilizer. We cannot recommend Cactus Brand Danish Ballhead too highly. (Pkt. 10c), (1 oz. 40c), (¼ lb. \$1.35), (lb. \$4.00), postpaid.

LATE LARGE FLAT DUTCH

A large flat head with a few useless outer leaves. Cuts white and crisp. Grows low with a very short stem. (Pkt. 10c), (oz. 30c), (¼ lb. \$1.00), (lb. \$3.00), postpaid.

USE ARSENATE OF LEAD OR PARIS GREEN FOR CABBAGE WORMS
SEE PAGE 74

(For Cabbage Aphids, use Black Leaf 40 or Nico Dust)

BUY THE BEST—WE DO

CABBAGE—Col-Repollo

A FIELD SCENE OF CACTUS BRAND COPENHAGEN MARKET CABBAGE

CACTUS BRAND COPENHAGEN MARKET

IS ONE OF THE EARLIEST ROUND HEADED CABBAGES

It is only a few days later than the Jersey Wakefield and the yield is much higher. The spherical heads reach, even with very small growing space, an average weight of about nine pounds. The stem is low, the leaves, in relation to the size of the head, are very small and fine. One great feature about Cactus Brand Copenhagen Market is that about 95 per cent of the heads are suitable for cutting at the same time so that the land may be cleared almost completely at one cutting. Under favorable growing conditions this Cabbage will mature in 12 to 15 weeks from time of transplanting and it is gradually becoming a favorite among gardeners and shippers.

Arizona climatic conditions are unsettled. During the Cabbage season we may have a great variety of weather within a week and it takes a hardy strain of seed to produce a plant that will be a success under these conditions. Cactus Brand Copenhagen Market will prove hardy under arid climatic conditions and will produce a crop. (Pkt. 10c), (oz 40c), (1/4 lb. \$1.35), (lb. \$4.00), postpaid.

CAULIFLOWER—Coliflor

Especially popular as a winter crop and with market gardeners proves a profitable crop, owing to the scarcity of good market vegetables when Cauliflower is at its best. It is easy to grow in the garden, providing the soil is made rich and porous. Plant seed the latter part of July and during August and September in Southern Arizona. In the higher altitudes plant the same as cabbage. Set in rows 24 inches apart and 14 inches apart in the row.

ARIZONA EARLY EXPRESS SNOWBALL—The earliest of all varieties and the surest heading variety on the market. Absolutely the best Cauliflower obtainable for Arizona conditions. Insist on this variety as it is a sure money-maker and conceded the best that ever reached the Eastern consuming markets in midwinter. Heads are pure white and well protected by outer leaves. (Pkt. 25c), (1/4 oz. 90c), (oz. \$2.50), (1/4 lb. \$7.50), (1 lb. \$30.00), postpaid.

LARGE PEARL—Heads much larger than Snowball and a trifle later. Planted at the same time a second crop is ready for market when the Snowball is gone. (Pkt. 15c), (1/4 oz. 65c), (oz. \$2.00), (1/4 lb. \$6.50), (lb. \$20.00), postpaid.

ARIZONA EARLY EXPRESS SNOWBALL

BUY THE BEST—WE DO

(If you are a market gardener, send us your list and we will quote you special prices on quantities)

CHINESE CABBAGE

CHINESE CABBAGE

Grow the same as you do lettuce—transplant to 10 inches apart in rows 12 inches apart.

One trial of this wonderful little cabbage will convince the grower that he has been missing something in the vegetable line. It is tender, crisp, blanches itself and is equally good raw or cooked. (Pkt. 10c), (oz. 50c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

COLLARDS—Col

An old time vegetable used for greens and green chicken feed. In Southern Arizona may be planted in Spring or Fall.

TRUE GEORGIA—(Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$2.00), postpaid.

CRESS or PEPPER GRASS

Sow thickly in shallow drills during February, March, September and October. Used for salads and for garnishing. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), postpaid.

WATER CRESS—Sow the seed in cool, moist soil or near shallow running water. (Pkt. 10c), (oz. 60c), (¼ lb. \$2.00), postpaid.

BRUSSELS SPROUTS

Berza de Bruselas

Seed should be sown the latter part of July in a shaded bed and transplanted, when large enough, to rows three feet apart and 18 inches apart in the row. If lice appear spray with a solution of Black Leaf 40 and fish oil soap.

TRUE IMPORTED—Produces on the stem compact sprouts resembling miniature cabbages. A delicious vegetable (Pkt. 10c), (oz. 30c), (¼ lb. 90c), (lb. \$2.75), postpaid.

CELERY Apio

(1 oz. to 3,000 plants or 200 feet of drill)

Sow the seed from June 1st to Sept. 1st, in drills 6 inches apart, not too thick in the row, to secure stalky plants. When the plants are strong, transplant to furrows four feet apart and 6 inches deep. Set the plants 6 inches apart in the furrows. As the plant grows, fill the earth toward the plant to secure proper bleaching. Never allow dirt to rest in the heart of the plant. Never work in Celery when it is wet with rain.

GOLDEN SELF-BLANCHING—Is a vigorous grower and early, easy to cultivate and in every way a desirable variety. The very handsome color of the crisp, heavy stalks, their freedom from stringiness and excellent flavor make it a market favorite. (Pkt. 10c), (oz. 80c), (¼ lb. \$2.65), (1 lb. \$8.00), postpaid.

GIANT PASCAL—Grown to some extent in the Salt River Valley, more particularly for the home market, for it is considered too crisp for shipping. The stalks are large, thick, solid and very brittle. (Pkt. 10c), (oz. 35c), (¼ lb. \$1.20), (lb. \$3.50), postpaid.

The above illustration shows one of our methods of testing all garden and field seeds.

SEED TESTING

To insure our customers as much as possible from purchasing seed of low vitality, we are constantly testing various varieties of seeds—both field and garden—using for the purpose modern electric testing and germinating machines. As a result of our efforts along this line, we are in a position to detect inferior goods and eliminate the seed from our stock. Any seed failing to meet the requirements and which we have reason to believe would not give entire satisfaction, are immediately removed from stock and not offered to our customers. We believe that work of this nature is worth while and when we consider we are here to give value received and cannot do so unless we put out high quality seeds, we figure that this work is more than justified, and, in the long run, we are more than repaid, for it means "satisfied customers."

CARROT—Zanahoria

The Carrot is one of the most wholesome and nutritious of our garden roots and it may be prepared in many appetizing ways. There is probably no root crop that will produce as much food on the same amount of land as the Carrot. In Southern valleys they may be left in the ground all Winter. Our Cactus Brand Carrot seeds are great producers under arid conditions. Plant plenty of them.

IMPROVED CHANTENAY

CULTURE

The Carrot is very easily grown, being perfectly hardy in all temperatures which come to Southern Arizona. Seed should be sown from September to May in drills 10 inches apart on ridges. It requires four pounds of seed for an acre or one ounce to 100 feet of drill. They are ready for table use in eight to ten weeks after planting, and remain good for three to four months. We especially recommend the Improved Chantenay Carrot for the family garden.

Sow in drills 15 to 18 inches apart, covering the seed one-half inch deep. Keep clean by frequent hoeing and weeding. If neglected, the young plants are easily smothered.

DANVERS HALF LONG—The best for general crop, will yield the most per acre. Most profitable for market gardeners. This variety originated in Massachusetts, where the raising of carrots is made a special business. On account of its productiveness and adaptability to all classes of soils it is now the most popular carrot grown. Tops are medium size, roots deep orange, large but of medium length, tapering uniformly to a blunt point. Smooth and handsome flesh, sweet, crisp and tender. (Pkt. 5c, (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

WHITE BELGIAN—Purely a stock variety, growing to enormous size; flesh and skin white, and very sweet; a yield of 15 to 20 tons to the acre is not unusual. The crop is easily gathered and makes a splendid food for Rabbits, Cattle, Horses and Hogs. (Pkt. 5c, (oz. 20c), (¼ lb. 45c), (lb. \$1.10), postpaid.

OX HEART—Beautiful shape and color. The roots generally attain four or five inches in length. Very tender and sweet. (Pkt. 5c, (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

IMPROVED CHANTENAY—Flesh a deep golden orange, roots smooth and very symmetrical. In size it ranks as intermediate between the Danvers and Ox Heart. It is very early and always produces smooth, shapely roots. Its fine appearance finds for it a ready market, its splendid table qualities keep it in demand. (Pkt. 5c), (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

IMPROVED LONG ORANGE—The roots grow uniform and smooth, of large size and deep rich orange color. A good keeper, of fine quality for table use and excellent for stock. (Pkt. 5c), (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

OX HEART CARROT

CELERIAC

or TURNIP ROOTED CELERY

LARGE, SMOOTH PRAGUE—A large celery root used for flavoring soups. (Pkt. 10c), (oz. 35c), (¼ lb. \$1.20), (lb. \$3.50), postpaid.

BUY THE BEST—WE DO

(Raise strong, healthy chicks with **CAPITOL BRAND CHICK MASH**. See page 66.)

SWEET CORN—Maiz Dulce

WRITE FOR
QUANTITY PRICES

CULTURE

Sweet Corn should be planted in the Spring, when all danger of frost is over and when the ground is warm enough to prevent the seed from decaying. Yellow Dent, Sacaton June and Hickory King may be planted in July as well, and Sweet Corn in August and early September. One pound of seed will plant about 200 feet of row and about 10 pounds is required for one acre.

Plant in hills 18 inches apart, with rows three feet apart. Plant four or five seed to the hill, but do not allow more than two stalks to stand, and remove all side shoots. Cultivate after each irrigation until corn shades the ground; this is very important. Irrigation should be governed largely by the texture of the soil, but never allow the soil to become dry.

All varieties listed here are successfully grown in Arizona. For larger quantities than found listed, write for special prices. For Corn Worm, we recommend dusting with Arsenate of Lead.

ADAMS EXTRA EARLY—Not a sugar corn, but one that is planted extensively by market gardeners. We have reports of it having reached the marketing stage in 52 days. (Pkt. 10c), (lb. 30c), (10 lbs. \$2.50), postpaid.

COUNTRY GENTLEMAN—An old standard variety of very fine quality. Kernels are deep and ear is somewhat smaller than most sweet

EARLY ADAMS

Improved Golden Bantam

An extra early sort of exceptionally fine flavor. Once tried always grown. For Southern Arizona, plant in March and August.

(Pkt. 10c), (½ lb. 20c), (lb. 35c), (10 lbs. \$3.00), postpaid.

corns. Matures in about ten weeks. Plant in March and July. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

OREGON EVERGREEN—The most popular and best main crop variety of the Sugar Corns. Of good strong growth, about six feet high. Ears keep in good condition for boiling a remarkably long time. Oregon Evergreen is a very early variety of excellent flavor and large size. Valuable as a fodder corn on account of its succulent stalks. (Pkt. 10c), (½ lb. 20c), (lb. 35c), (10 lbs. \$3.00), postpaid.

STOWELL'S EVERGREEN—The standard sort of main crop everywhere. Ears large, deep grained, exceptionally tender and sugary; remains tender and eatable longer than any other variety. A general favorite with canners and market gardeners for late use. (Pkt. 10c), (½ lb. 20c), (lb. 35c), (10 lbs. \$3.00), postpaid.

MEXICAN JUNE—ARIZONA CROPPER JUNE CORN

DEVELOPED ESPECIALLY FOR ENSILAGE AND ROASTING EARS

Last year we imported some very fine June corn from New Mexico. This seed, which had been bred up for several years, was absolutely a pure strain of June Corn. We had it planted in very rich soil, giving us an excellent crop from which to select seed. Our New Arizona Cropper strain developed corn with sixteen rows to the ear, two ears per stalk, and the stalks average from 12 to 16 feet in height. Twenty to thirty tons of silage can be produced per acre from this superior strain of seed. Plant 12 to 20 lbs. per acre for silage, as thickness in planting, while retarding ear development, will give increased tonnage. For a corn crop plant 8 to 10 lbs. per acre

25c per lb.; 10 lbs., \$2.00, postpaid. Write for prices on larger quantities.

FIELD CORN

HICKORY KING—Is a distinct variety which has come very much into favor for either dry land or irrigating. Has an extremely wide grain and long cob. The ears are from 8 to 10 inches in length and are generally borne two to four ears per stalk, making it very productive. It makes excellent roasting ears and is often used in place of sugar corn. Grows to a height of 7 to 9 feet and is in every way highly desirable. (Lb. 25c), (10 lbs. \$2.00), postpaid. Write for prices on larger quantities.

YELLOW DENT—A very heavy yielding sort with long, soft kernels. Ears average 10 inches in length and have 16 rows. The only yellow corn for this section. Excellent for roasting ears in 85 days. (Lb. 25c), (10 lbs. \$2.00), postpaid. Write for prices on larger quantities.

POP CORN

WHITE RICE—Most popular variety, very prolific. Ears short; kernels long, resembling rice in shape and color. (Pkt. 10c), (lb. 30c), (10 lbs. \$2.50), postpaid.

(Send in your orders early. Our Quality Seeds and prompt service will please you)

BUY THE BEST—WE DO

CUCUMBER—Pepino

ARIZONA DAVIS PERFECT

CULTURE

Cucumbers should be grown in hills four feet apart each way, eight to ten seeds in a hill, covered as lightly as can be trusted to retain the moisture until the plants take hold. Plant in August and early September for Fall crop. They require an abundance of water and frequent cultivation to obtain best results. When danger of insects is past, thin plants to three or four in a hill. If planting is done after the soil has become warm, they will be ready for the table in six weeks after planting. One ounce of seed will plant 50 hills and two lbs. an acre.

KLONDIKE—A splendid variety for pickling as well as for the market. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

IMPROVED LONG GREEN—Dark green, growing 10 to 12 inches long. An old favorite. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

BOSTON PICKLING—One of the best pickling varieties, being of medium size and dark green. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

ARIZONA DAVIS PERFECT—For market gardeners this is the ideal cucumber, because of its wonderful uniformity, it being, long, slender and tapering to the same shape at both ends. They pack well in crates or boxes and present a beautiful appearance. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

EARLY WHITE SPINE—Suitable for slicing. Very uniform, solid and crisp. Vines are of vigorous growth. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

LEMON—As its name indicates, it is somewhat similar in shape to a lemon. The flesh is tender and crisp. They are excellent for pickling, either green or ripe. For slicing they should be used just as the fruit is turning yellow. (Pkt. 10c), (oz. 25c), (¼ lb. 85c), (1 lb. \$2.50), postpaid.

JAPANESE CLIMBING—While all cucumbers are running vines, this one is much more so. It is a distinct variety, readily climbing on poles or trellises. A pickling variety. Quality is splendid. (Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

HERBS

HERBS IN COOKING

Every good cook uses herbs in the culinary art, but comparatively few housewives are acquainted with the delicious and appetizing flavors secured by the addition to many dishes of one or more of the old fashioned herbs. Easily grown in the house yard and preserved for use simply by drying and placing in tight jars, no order for garden seeds should fail to include them.

Anise

BUY THE BEST—WE DO

(Use NICO DUST for Aphis on Cucumber Vines. See page 74)

VEGETABLE SEEDS

MUSTARD—Mostaza

Sow in the Spring or Autumn. Not particular as to soil, though a medium heavy one is best.

OSTRICH PLUME—So called for its feathery appearance. Ornamental as well as useful. (Pkt. 10c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

SOUTHERN GIANT CURLED—Leaves large, 14 to 16 inches in length, which are cooked like spinach and have a very agreeable flavor. (Pkt. 10c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

WHITE LONDON—Best for salads or medicinal purposes. (Pkt. 10c), (oz. 15c), (lb. 75c), postpaid.

ENDIVE

Sow any time except during the extreme heat in Summer. When plants are three or four inches high, transplant to rows 18 inches apart. After plants are well grown, gather up leaves and tie at tips into a loose bunch to bleach the inner leaves. This vegetable is highly esteemed as a salad, and grows to perfection here. One ounce of seed will sow 150 feet.

GREEN CURLED—Leaves are finely cut or lacinated, giving the plants a rich, mossy appearance which is greatly enhanced when the centers are nicely blanched. This is the variety generally preferred because it blanches to a beautiful golden yellow. (Pkt. 10c), (oz. 20c), (¼ lb. 70c), (lb. \$2.00), postpaid.

NEW YORK IMPROVED

EGG PLANT—Berengena

This popular vegetable is indeed at home in Southern Arizona, 40 to 50 pounds of perfect specimens having been produced on a single plant. Since the seed is slow to germinate, great care must be taken in preparing the bed. Sow in hot beds or boxes and transplant when danger of frost is past. Plant two feet apart in 4-ft. rows. It is important to secure a rapid and continuous growth, therefore frequent

watering and cultivation is necessary. Our acclimated seed is the best to be had. One ounce of seed will produce about 1000 plants.

NEW YORK IMPROVED

This variety has superseded all others, both for market and home use. (Pkt. 10c), (oz. 75c), (¼ lb. \$2.50), (1 lb. \$7.50), postpaid.

BLACK BEAUTY

A handsome extra early large variety. (Pkt. 10c), (oz. 75c), (¼ lb. \$2.50), (lb. \$7.50), postpaid.

LEEK—Puerro

CULTURE—Leek is a very hardy plant with a sweet onion-like flavor. It resembles the young onion growth in the Spring as it does not bulb. The neck or stems are blanched by drawing the earth up about them as the plant grows in size or they can be transplanted to trenches and the trench gradually filled as the plant grows. They should be planted in drills or rows 16 to 20 inches apart and the plants 10 to 12 inches apart. Plant seed in seed bed, broadcast or in drills, covered to depth of one-half inch, and when they are about as thick as a good-sized goose quill they should be transplanted.

LARGE LONDON—A large and strong plant. (Pkt. 10c), (oz. 35c), (¼ lb. \$1.15), (lb. \$3.50), postpaid.

KALE or BORECOLE

Breton Berza

CULTURE—This is a very popular boiling green and in Arizona can be grown the entire year. It resembles cabbage in flavor; is a hardy plant and can be grown easily from seed. We consider the Tall Scotch variety the best. Seed should be sown thickly in drills, during the Spring and Fall months. Transplant to 12 inches apart in 4-ft. rows. One ounce will plant 100 feet of drill.

TALL SCOTCH—Grows to a height of about 2½ feet. (Pkt. 10c), (oz. 25c), (¼ lb. 65c), (lb. \$2.00), postpaid.

KOHLRABI—Colinabo

CULTURE—This vegetable is a cross between a cabbage and a turnip. The edible portion is the large bulb which forms on the stem above the soil. We advise successive sowing in order to obtain tender bulbs, which have a mild, delicate, cabbage-like flavor. It is a hardy plant and seed may be sown practically all the year around, with the exception of the hottest months. Plant it like turnips and thin to six inches apart in row. One ounce of seed will produce 2000 plants.

EARLY WHITE VIENNA—Early and tender, having a flavor all its own. (Pkt. 10c), (oz. 30c), (¼ lb. \$1.00), (lb. \$3.00), postpaid.

GARLIC SETS

Garlic has become a very profitable crop in the Salt River Valley. The demand is always good and prices are high. It should be planted in climates similar to Salt River Valley during October and November. In the higher altitudes during the Spring season. In planting separate the little bullets and plant the same as onion sets. One pound will plant 50 feet of row.

(Per lb. 35c), postpaid. Ask for quantity price

LETTUCE—Lechuga

CULTURE—Lettuce is very exacting as to soil requirements. It is best suited to a rich, light loam, and should never be planted on soils of poor quality. Irrigation is necessary throughout the entire growing period, except during the rainy season, but the crop is easily ruined by an excess of water. The crop stands cold better than heat.

At the time of planting, the soil should be in the finest possible condition. The plants should be grown on ridges, 12 to 18 inches wide, four to six inches high and 10 to 15 inches apart. The water should be run between the ridges and not flow over the tops, and should never be allowed to cover the plants. There should always be an adequate amount of moisture in the soil from the time the plants have commenced to head until they have matured.

Cultivation is necessary after each irrigation as the soil should never be allowed to harden around the plants. Hard head lettuce, such as Arizona Wonderful, New York, Big Boston and Hanson, should be planted from September on and Iceberg head lettuce and leaf lettuce in January, February and March. In warm weather the lettuce should be cut early in the morning and never when the heads are wet, as in that condition they will heat and quickly rot. The field is gone over from two to five times during the cutting season. Plant 2 pounds of seed to the acre.

ICEBERG LETTUCE

ARIZONA WONDERFUL LETTUCE

THE LEADING HEAD LETTUCE

A large, crisp tight heading lettuce which is a great favorite wherever grown. We have had no end of praise from our friends who have tried this variety. The quality is the finest, and the heads grow to enormous size, weighing on an average of two pounds. It stands shipping well, having heavy outer leaves to protect the head when packed.

(Pkt. 10c), (oz. 25c), (¼ lb. 85c), (lb. \$2.50).

LEAF LETTUCE

DENVER MARKET—For the family garden plant this variety broadcast on ridges allowing it to grow thick. Tender bunches may be cut in a few weeks after planting and it will continue to grow together, as thinned for table use. Very fine, crisp and early. (Pkt. 10c), (oz. 20c), ¼ lb. 60c), (lb. \$1.75), postpaid.

EARLY CURLED SIMPSON—A very popular variety of loose leaf lettuce. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

PRIZEHEAD—One of the very best loose bunching or non-heading varieties. Leaves brown, very early and of remarkably fine flavor. Grows quickly and all except the outer row of leaves are very brittle. It is probably the most easily grown lettuce in cultivation. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

HEAD LETTUCE

New York Special—Hardy, uniform heads, wavy light green outer leaves with the center bleached pure white. Crisp, tender and with a flavor that never fails to please. In planting New York Market Lettuce, be sure to thin out to ten inches between plants, as it does not head well if allowed to grow thick. (See page 5).

(Pkt. 10c), (oz. 25c), (¼ lb. 85c), (lb. \$2.50), postpaid.

WHITE PARIS COS—The best variety of the Cos Lettuce. Forms a large, light green plant with the head well folded and quite solid. Cos Lettuce is also called Romaine, and while it is little known here it is highly prized in Europe, and should be planted more extensively here. It is brittle, milky and very sweet, having a flavor not found in any other lettuce. (Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

BIG BOSTON—Large solid heads of a light green color. Leaves smooth, broad and thin. We have experimented with this variety and have found it to be very satisfactory. (Pkt. 10c), (oz. 25c), (¼ lb. 85c), (lb. \$2.50), postpaid.

IMPROVED HANSON—An old time head variety. (Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

ICEBERG—A splendid Head Lettuce. For Spring planting—compact, tender, crisp, creamy white heads. Grows a solid head in midsummer and is highly praised by all users. Grow this large, crisp, tender and sweet Summer heading lettuce when other varieties will not head. (Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

BUY THE BEST—WE DO

(Destroy Ants with Calcium Cyanide. —See page 75)

WATERMELONS—Sandia

CULTURE

Plant the seed in a furrow, dropping six seeds every eight or ten feet apart; cover about two inches. As the vines grow, hill the earth about them until the roots are 10 to 12 inches deep. When the vines are safely established, thin out, leaving only two vines to the hill. It is a good plan to establish your rows by throwing the soil toward the center, with one round of plowing, and cultivate every week during the early growth of the plants. This gives deep cultivation at the time it is needed, mulches the soil properly, makes proper rows slightly raised in the center, allowing a low place between for irrigating, as soon as the nature of the soil will permit. If these instructions are carefully followed you will have thrifty vines throughout the season.

Use one ounce of seed for the average garden. One ounce will plant 20 to 30 hills. Three pounds is required to the acre.

KLECKLEY'S SWEET

OUR CACTUS BRAND KLECKLEY'S SWEET

Good Producer—Good Flavor—Good Shipper

It is quite difficult to make a choice of Watermelons. There are hundreds of varieties and most all of them have some good qualities, but after having tested many of them, we have boiled the list down to what seems to be the most popular varieties. The Cactus Brand Kleckley's Sweet has given wonderful results and each year we find the sale increasing. It is an excellent shipper, ripens early and the flavor is fine.

By careful selection we have produced a uniform size, medium rind and a bright red flesh. For local market or for shipping you will find Cactus Brand Kleckley's Sweet a winner. (Pkt. 5c), (oz. 20c), (¼ lb. 40c), (lb. \$1.25), (5 lbs. \$5.00), (10 lbs. \$9.00), postpaid.

WRITE FOR OUR ATTRACTIVE QUANTITY PRICES

WHITE SEEDED CHILIAN—By far the most popular melon for home garden, it being small and of very fine flavor. Flesh a rich, deep red, ripening to a very thin rind. It is almost round in shape, having a rind of dark green slightly striped. (Pkt. 5c), (oz. 20c), (¼ lb. 45c), (lb. \$1.00), postpaid.

BLACK SEEDED CHILIAN—Has all the admirable qualities of the white seed melon. Grows a little smaller, has a very thin rind of rich green color, and if anything is a little more sugary. (Pkt. 5c), (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

ALABAMA SWEET—The best melon grown for shipping. Oblong, very sweet, dark green, faintly striped, entirely stringless; very prolific. We cannot recommend this melon too highly. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

"IRISH GREY"

New and good watermelons don't come often but this new South Georgia variety is one that has attained great popularity on its merit. It's a combination melon equally good for shipping or home use, being equal to or better than the Watson in that respect. It's sweet; the flesh is red, crisp and free from stringiness and in color of rind a mottled greenish grey, entirely distinct. Rind is thin but very tough. Long distance shipments go through perfectly. Vines very vigorous, healthy and hold up and produce fine melons late into summer when other sorts die out. Plant "Irish Grey" for home or market use and you will be delighted. It's as satisfactory a melon as there is grown.

(Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

WATERMELONS—Sandia

CACTUS BRAND—THE NEW TOM WATSON Very Large—Very Profitable

An extra large Melon of attractive appearance, uniform shape and very fine flavor. The average Cactus Brand Tom Watson will weigh 40 pounds, and we had specimens this past season weighing 65 pounds. It is an excellent shipping Melon and commands a good price on any market, due to its very large size. The tonnage per acre is enormous. The Cactus Brand Tom Watson and Kleckley's Sweet make an excellent combination for large shippers.

(Pkt. 5c), (oz. 20c), (¼ lb. 30c), (lb. \$1.00), (5 lbs. \$4.50), (10 lbs. \$8.00), postpaid.

WRITE FOR OUR ATTRACTIVE QUANTITY PRICES.

STONE MOUNTAIN

A new introduction of the best quality, and is claimed to be the sweetest of all large melons; in shape it is almost round, dark green rind, medium thick; flesh rich scarlet. Not unusual to grow Stone Mountains weighing 70 to 80 lbs. For home and nearby markets it is unexcelled. Seeds white with black tips.

(Pkt. 5c), (oz. 20c), (¼ lb. 50c), (1 lb. \$1.50), postpaid.

TRUE AUGUSTA RATTLESNAKE—This melon rapidly deteriorates unless it is severely rogued, therefore we take particular care in seed selection. It is elongated gray, with green stripes; good size, with maximum of 50 to 60 pounds. Seed white with black ears; flesh crisp and excellent. Medium early. (Pkt. 5c), (oz. 20c), (¼ lb. 40c), (lb. \$1.25), postpaid.

ICE CREAM—A medium sized oval melon of bright green color, finely veined with a darker green shade. The flesh is a light pink, shading to golden yellow, and is very sweet and sugary. (Pkt. 5c), (oz. 20c), (¼ lb. 40c), (lb. \$1.25), postpaid.

THE EXCEL—A new black-seeded melon that has made a sensation in the South. Its surpassing merits are in the size (average weight per melon in car is 35 pounds), enormous yield and excels all others as a shipper. We planted an acre on our trial grounds and find it is not only all that is claimed for it, but we were surprised at the excellence of its flavor. We recommend it to all shippers who want a very large melon. (Pkt. 5c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

HALBERT'S HONEY—This melon ripens early in all melon-growing districts. The melons are of cylindrical oblong form, with smoothly rounded ends. The rind is thin, the flesh crimson and of the very finest flavor. (Pkt. 5c), (oz. 20c), (¼ lb. 40c), (lb. \$1.25), postpaid.

KLONDIKE—One of the best melons grown for home use. The rind is very thin and of a medium green color. The flesh is a bright red, tender and deliciously sweet. The Klondike is not a shipping melon, for the rind is too thin. It does not make a heavy vine, therefore in the hot valleys of Southern Arizona it should be planted in the same hill with other varieties growing a strong vine. This protects the melon from the hot sun and the planter is rewarded with the most delicious fruit in the melon line. (Pkt. 10c), (oz. 25c), (¼ lb. 85c), (lb. \$2.50), postpaid.

SWEETHEART—Remains in condition for use longer than any other sort. Fruit early, large, oval and very solid. Flesh bright red, tender and sweet. Rind thin but strong, making it a good shipper. (Pkt. 5c), (oz. 20c), (¼ lb. 30c), (lb. \$1.00), postpaid.

FLORIDA FAVORITE

Oblong in shape, very early and a good shipper. Flesh light crimson, crisp and deliciously sweet. This melon is a favorite among shippers in the Salt River Valley.

(Pkt. 5c), (oz. 20c), (¼ lb. 30c), (lb. \$1.00), (5 lbs. \$4.50), (10 lbs. \$8.00), postpaid.

WATERMELON—Sandia

ANGELENO WATERMELON

WHITE SEEDED ANGELENO—This melon is highly praised on the Phoenix market because of its excellent shipping qualities, uniform shape and fine flavor. It is almost round, with a beautiful dark green rind which makes it attractive to the buyer. Do not pick until the yellow shows slightly through the green and you will never disappoint your customer with a green melon. (Pkt. 5c), (oz. 20c), (¼ lb. 40c), (lb. \$1.25), postpaid.

THE NEW BLACK SEEDED

ANGELENO WATERMELON

A combination of the unexcelled qualities of the famous Angeleno and the favorite black-seeded Chilian. Undoubtedly a melon of par excellence and a prime favorite for the market. The sweet crisp meat of this melon, together with its crisp, sugar crystal formation, endears it upon first use. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

CITRON MELONS

GREEN SEEDED OR STOCK CITRON

One of the most productive of the stock melons. They will keep indefinitely. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

PRESERVING CITRONS

The Red Seeded type is most desirable for preserves, the flesh being solid and white. (Pkt. 5c), (oz. 20c), (¼ lb. 40c), (lb. \$1.25), postpaid.

GREEN FLESH

Honey Dew Melon

THE LAST WORD IN FLAVOR

Honey Dew Melon—The average size of this melon is six inches in diameter and seven to eight inches in length, weighing about six pounds. The skin is smooth and is a creamy yellow when ripe. The flesh is an emerald green, very thick, and of the very finest flavor, having a mingling of banana, pineapple and vanilla. It begins maturing about ten days later than cantaloupes and is very prolific. The melon slips from the stem, and for home use they should not be pulled until they reach that stage. Because of their keeping qualities they are excellent shippers, many carloads of them going East each season. (Pkt. 10c), (oz. 25c), (¼ lb. 75c), (lb. \$2.25), postpaid.

GOLDEN HONEY DEW

Developed from a sport from the green meat Honey Dew. The flesh is a rich golden color. Very sweet and spicy. Many prefer it and it should pay the grower well. Size slightly smaller than the green meat Honey Dew and a few days earlier to mature. (Pkt. 10c), (oz. 30c), ¼ lb. \$1.00, lb. \$3.00, postpaid.

BUY THE BEST—WE DO

MUSKMELONS—Melone or CANTALOUPE

CULTURE

Muskmelons must not under ordinary gardening conditions be planted until all danger of frost is past. Warm ground is essential to the germination of the seed, for if planted too early in the Spring it will rot. It is highly important that your soil should be in proper planting condition. First, it must be thoroughly soaked or irrigated. Second, as quickly as the moisture has thoroughly penetrated and the soil is in a tillable or workable condition, spade or plow the ground and see that it is thoroughly pulverized. Third, prepare furrows 6 to 8 inches in depth and 5 to 7 feet apart, according to space you can spare. Fourth, plant the seed in the furrows about 6 feet apart, covering the seed not more than 1 inch deep and as the plant grows, gradually fill up the furrow about it with soil until level with surface. Continuous cultivation is now necessary and where soil conditions require, systematic irrigation should be followed. Do not, however, irrigate close to the plant as it will cause dampening off, and other diseases. The roots of the plant being as long as the vine, close up irrigation is not necessary and in cultivating see that these roots are not disturbed as it would ruin the plant. Practice frequent shallow cultivation. Plant 8 seeds to the hill and when thoroughly established pull out all but three. One and one-half to two pounds of seed is used to an acre.

IMPROVED EDEN GEM

Without doubt this is the best general purpose melon on the market today. It is uniform, well netted and a fine melon for market or home use. Several carloads of them are shipped from this valley each season and they command a good price. The above photograph will give some idea of their uniformity. They produce wonderfully and ship well. The meat is green, with a slight salmon tint in the seed cavity. Our seed is from first cut select melons only and will produce the finest melons you ever had in your garden.

Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

“HEARTS OF GOLD” OR IMPROVED HOODOO

This splendid melon has been grown commercially in the Salt River Valley for the past few years with marked success as a shipping melon as well as for local consumption.

The vines are hardy, strong, vigorous growers and rarely affected by rust. It is very early and prolific; has been known to mature in 70 days from planting.

The melons run from oval to oblong in shape; very uniform in size, averaging a little larger

than the Rocky Ford varieties. While it is a ribbed melon, the ribs are not prominent and very heavily netted. The flesh is a rich orange color, fine grained and of excellent flavor. The seed cavity is very small. The melon does not turn yellow when ripe but retains its natural green color and remains solid and firm for days after it is picked from the vine.

(Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.75), postpaid.

BUY THE BEST—WE DO

(We are headquarters for Insecticides, Sprayers and Dusters—See pages 72-74)

No. 1025—IMPROVED SALMON TINTED

No. 1025

Improved Salmon-Tint No. 10-25

This is an early melon of the solid netted type that is so desirable. Very small seed cavity, with thick, luscious flesh of genuine salmon tint, shading to green near the rind. A splendid keeper that stands shipping and always arrives in the best possible condition. It has been successful in the East, in the West, and in the South. It is a prolific yielder and has been pronounced by every one who has used it as the ultimate in salmon-fleshed melons. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

Delicious Gold-Lined ROCKY FORD

The shape is ideal, being slightly oval, and it is heavily netted over the entire surface. The flesh of the entire melon is noticeably thick, fine grained and sweet. The color is green with a gold margin next to the seed cavity. Attractive both as to outward appearance and when cut.

(Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

IMPROVED FORD HOOK—Standard size, round and well netted. The flesh is a rich salmon, with a small seed cavity. The flavor is excellent, being rich and sweet to the rind. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

EMERALD GEM—A salmon-tinted variety of remarkably fine flavor and fine quality. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

EXTRA EARLY HACKENSACK—The melons are of good size, weighing from five to ten pounds each. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

TIP TOP—Green fleshed, oval with flattened ends. The seed cavity is small and the flesh firm. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

EDWARDS' PERFECTO

This variety has become a great favorite; quite rust-resistant. The meat is salmon about two-thirds the depth; firm grained and of good flavor.

(Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

HALE'S BEST

The Hale's Best Cantaloupe is large, running about nine to the Jumbo flat crate. Well netted, oblong, very solid; the flesh is deep, salmon colored, fine grained and of good quality.

(Pkt. 10c), (oz. 30c), (¼ lb. \$1.00), (1 lb. \$3.00), postpaid.

HONEY BALL

A new cross from Honey Dew and Cantaloupe. Similar to Honey Dew but quite well netted with a strong Pomegranate flavor and scent. We strongly recommend it for home use. (Pkt. 10c), (oz. 30c), (¼ lb. \$1.00), (lb. \$3.00).

ROCKY FORD—Thoroughbred. Rust resistant. The shape is slightly oval, skin a rich, greenish gold when fully ripe and the flesh a light green. We can recommend it highly for home or local market. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

PINK MEAT or IMPROVED BURRELL GEM—The Jumbo Pink Meat or Improved Burrell Gem is a decided improvement over the old type. It has become well known and takes its place as a standard variety in the Salt River Valley. Its shape is oblong and tapering to ends, averaging 7 to 9 inches in length, producing a large percent of jumbo crates, which always sell at a premium. The flesh is a golden pink color, very deep and shows a comparatively small seed cavity. It has proven one of our heaviest yielders and a most excellent shipper. The flavor is sweet and spicy, distinctive of this particular variety. The rind is almost entirely covered with a heavy solid net, the blossom end being well protected. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

PAUL ROSE—Handsome; oval; new variety; rich orange; flesh very sweet. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

PERSIAN MELON—Yellow flesh, heavily netted but of smooth rind. Very sweet and of distinctive flavor. Splendid keeper. Average weight about seven pounds each; many much larger. (Pkt. 10c), (oz. 50c), (¼ lb. \$1.65), (1 lb. \$5.00), postpaid.

CASABA MELONS

Plant More Casabas

Cultivate the same as muskmelon, and plant, according to your locality, from February 15 until July 15; for late shipping, June 1 to August 1 seems to be the best time for planting.

Picking at the proper time is very important. If desired for immediate use do not pick until the rind will give under pressure, using the thumb to determine this. If rind is firm the melon is not ripe and full flavor has not yet developed.

Casabas can be picked green and held in storage until ripe. Green melons are used for shipments of any distance. Do not pick for shipment until the melon has lost its shiny appearance.

GOLDEN BEAUTY

Golden Beauty — Grows from six to eight inches in diameter, nearly round, color a perfect golden yellow and rind very hard. This is perhaps the best flavored variety of casaba.

(Pkt. 10c), (oz. 20c), ($\frac{1}{4}$ lb. 65c), (lb. \$2.00), postpaid.

WINTER PINEAPPLE—The true Winter sort. Large green fleshed melon, having a corrugated skin and a decided pineapple flavor. Pick after the melon has lost its green lustre, and store in a cool, dry place until thoroughly ripe. (Pkt. 10c), (oz. 20c), ($\frac{1}{4}$ lb. 70c), (lb. \$2.00), postpaid.

IMPROVED HYBRID—Smooth rind, white flesh and of fine flavor. Excellent for local market or shipping. (Pkt. 10c), (oz. 25c), ($\frac{1}{4}$ lb. 85c), (lb. \$2.50), postpaid.

P E A N U T S

A GREAT AMERICAN FOOD

Plant more peanuts—they are one of America's best and cheapest foods. One pound of whole peanuts contains nearly one-half pound of fat and one-fourth pound of protein, while one pound of beefsteak yields less than one-third as much and one pound of eggs less than one-fifth that amount. The demand for peanuts as a food is increasing by leaps and bounds and great strides are being made in its culture and consumption. Thousands of acres are planted in the United States every year, the average yield being 34 bushels per acre.

Peanuts require a five to six months' growing season. In Southern valleys they should be planted in March or April, when danger of frost is over; they will then mature about September. It requires about 10 pounds shelled or 15 pounds of unshelled nuts to plant an acre. Plant about 20 inches apart in the row and the rows 3 feet apart. In irrigated districts plant level and gradually hill to row. Irrigate about three times per month during hot weather and cultivate after each irrigation.

SPANISH—The small variety used principally for hog feed and oil. (lb. 35c), (10 lbs. \$3.00), Postpaid to 1st, 2nd and 3rd zones.

VIRGINIA BUNCH—The large variety used for roasting and for peanut butter. (Lb. 30c), (10 lbs. \$2.50). Postpaid to 1st, 2nd and 3rd zones

ONIONS—Cebolla

CULTURE

For the small garden for which these instructions are intended we advise planting only Bermuda Onions, the Crystal White Wax, the Sweet Spanish, the Australian Brown and the Yellow Globe Danvers. These are mild and

GREAT GREEN BUNCH ONION

good keepers and are suitable for green onions or mature. For green onions plant from Sept. 15 to March 1, in double rows six inches apart on ridges 12 inches apart at the rate of 4 oz. of seed to 100 feet of row. Thin out as pulled for table use and if any are left they will produce mature onions in five to seven months from planting. They will respond readily to liberal fertilization, chicken or barn yard manure being highly recommended. Some commercial fertilizers will force them but affect the keeping qualities.

If you contemplate an acreage of onions do not fail to get our illustrated catalogue on the Planet Jr. Planter. One of these famous planters will pay for itself in the saving of seed on one crop. Endorsed by many Arizona market gardeners. For field planting, 1 oz. of seed will plant 100 feet of row, and 3 pounds are required to plant an acre. Write for special prices in quantity.

RED BERMUDA—In shape, like the Yellow Bermuda, color a pale red. Planted during January, matures latter part of June. No other onion is ready for use so quickly after planting seed. It is the right onion for the home garden. (Pkt. 10c), (oz. 50c), ($\frac{1}{4}$ lb. \$1.65), (lb. \$5.00), postpaid.

AUSTRALIAN BROWN—This onion has claimed a place in America within recent years and seems abundantly able to maintain it. It is of medium size and of good quality; very early; rather flattened in shape; of brown color, and wonderfully hard and mild. It begins to form a bulb at an early period of its growth, when only a few inches high and quickly reaches maturity. Its leading and most valuable quality is its long keeping quality. Properly handled it will keep for months. (Pkt. 10c), (oz. 20c), ($\frac{1}{4}$ lb. 70c), (lb. \$2.00), postpaid.

CRYSTAL WHITE WAX—Teneriffe grown. A large white onion of the Bermuda type becoming more popular every year. It is mild and sweet, an excellent keeper and presents a beautiful appearance on the market, being of a waxy white, clean cut and uniform. It produces few seeds, therefore remains high priced, but regardless of the price a small quantity should be included in each order. (Pkt. 10c), (oz. 60c), ($\frac{1}{4}$ lb. \$2.00), (lb. \$6.00), postpaid.

GREAT GREEN BUNCH ONION—Will produce green onions large enough for table use in about 75 days. (Pkt. 10c), (oz. 35c), ($\frac{1}{4}$ lb. \$1.20), (lb. \$3.50), postpaid.

YELLOW BERMUDA—Teneriffe grown. We import direct from the noted island of Teneriffe our seed which is grown by the most reliable seed grower in that celebrated district. This variety is more extensively grown in Arizona than any other and we recommend it and the Crystal Wax in preference to the many varieties usually offered in seed catalogues. For the reason that these few varieties have proven so highly satisfactory we limit our offerings to them and urge that these only be planted. The Yellow Bermuda is a pale straw color, flat and very mild. (Pkt. 10c), (oz. 40c), ($\frac{1}{4}$ lb. \$1.25), (lb. \$4.00), postpaid.

YELLOW GLOBE DANVERS—A very popular variety for home garden or market. Medium size, globular shape and mild. (Pkt. 10c), (oz. 30c), ($\frac{1}{4}$ lb. 90c), (lb. \$2.75), postpaid.

SILVER SKIN—Planted principally by market gardeners for a bunch onion, but the White Bermuda answers the purpose better because of its mildness. The Silver Skin is of medium size and early. (Pkt. 10c), (oz. 40c), ($\frac{1}{4}$ lb. \$1.35), (lb. \$4.00), postpaid.

AUSTRALIAN BROWN

ONION SETS

ONION SETS

We are large dealers in Onion Sets. Ask us for quantity prices.

One lb. of sets will plant about 75 ft. of row—about 250 lbs. required for one acre.

Early Green Onions are obtained much earlier by setting out sets than by sowing seed. Seed, however, should be sown to follow the crop grown from sets. Usually our Sets are ready about September 15 and we can supply them until May.

WHITE—(Lb. 35c), (10 lbs. \$3.00), postpaid.

YELLOW—(Lb. 30c), (10 lbs. \$2.50), postpaid.

OKRA or GUMBO—Quimbambo

This popular vegetable of the South is not largely grown in Arizona, but it thrives well under Arizona conditions. It requires generous water supply and responds readily to fertilizer and cultivation. Sow seed after February 15, or when danger of frost is over, in drills and thin plants to one foot apart. One ounce will sow 50 feet of row. It requires about 90 days to grow to marketing size.

TALL GREEN—Very productive. (Pkt. 10c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

WHITE VELVET—The well-known pickle variety. (Pkt. 10c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

DWARF GREEN—A short pod variety, very popular on the market. (Pkt. 10c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

ONION — RIVERSIDE SWEET SPANISH

ONION — RIVERSIDE SWEET SPANISH

(IMPROVED VALENCIA)

This onion was introduced from Spain several years ago and accepted with great favor in the Salt River Valley. It grows very large, light yellow in color, globe shaped with small top and is an excellent keeper and shipper.

The unusual mildness and excellent flavor of the RIVERSIDE SWEET SPANISH has created a great demand. In mildness and flavor it surpasses all others and with these qualities it takes first place in all markets where it is offered. From the grower's standpoint it is a most profitable variety because of the very heavy yield and the ease with which it is grown.

(Pkt. 10c), (Oz. 60c), (¼ Lb. \$2.00), (Lb. \$6.00), postpaid.

BUY THE BEST—WE DO

(Refer to page 50 for Giant Zinnias
— Splendid for Summer Blooms)

PEPPERS—Pimento o Chili

CULTURE

Sow in hot beds in November and December, in boxes or cold frames in January and February, and in the field where they are to remain, in March. Plants grown in the bed should not be set in the field until the weather is warm and all danger of frost is past. The soil should be highly fertilized and plants should be kept well watered at all times. Plant in rows 30 inches apart and 18 inches apart in the row. One ounce of seed will produce 1000 plants.

ANAHEIM CHILI

ANAHEIM CHILI—Slender pod about seven inches in length, desired for slicing because of its freshness and slight pungency. It has no insect enemies and when dried the pods are not perishable, therefore it is a safe crop to plant and often proves very profitable. The estimated yield of dry peppers is one ton to the acre. (Pkt 10c), (oz. 50c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

LARGE BELL or BULL NOSE—An early variety and of mild, sweet flavor; the skin is quite fleshy, and of medium size. This is a very popular pepper. (Pkt. 10c), (oz. 80c), (¼ lb. \$2.65), (lb. \$8.00), postpaid.

MEXICAN CHILI—Red hot, green or ripe, just the thing for drying and flavoring Spanish dishes. It is a medium size, pear shaped pepper and turns a bluish black when dried. (Pkt. 10c), (oz. 50c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

PIMIENTO—A sweet pepper, excellent for canning or salads. Every home garden should have a row of Pimientos. Stuffed and baked it is far superior to all other peppers. (Pkt. 10c), (oz. 60c), (¼ lb. \$2.00), (lb. \$6.00), postpaid.

Chinese Giant Pepper

CHINESE GIANT PEPPER—A pepper of exceptional merit. It is very mild in flavor and is an ideal variety for the home garden. Produces enormous peppers measuring as much as five inches broad at the top and of equal length. It is highly productive, plants being so thickly covered that they appear to bear in clusters. Its flesh is thick, solid, but of fine texture, making the ideal stuffing pepper, for which purpose it is greatly and rightly famed. (Pkt. 10c), (oz. \$1.20), (¼ lb. \$4.00), (lb. \$12.00), postpaid.

CHINESE GIANT PEPPER

California Wonder Pepper

SUPERSEDES ALL OTHER VARIETIES

A bright, attractive green, changing to a brilliant light crimson. Sweet and spicy, with no bite to it. Not only is it ideal in size and shape but the meat is thicker, firmer and freer from crooks and wrinkles than any other sort.

(Pkt. 25c), (oz. \$2.50), (¼ lb. \$7.50), (lb. \$25.00), postpaid.

(See page 34 for Pepper Plants)

PEAS—Chicharos o Alverjon

Write for Quantity Prices

1 lb. to 80 feet of drill; 50 to 80 lbs. to the acre

CULTURE

Peas should be planted during the months of September, October, November, January, February, March and April. They are very hardy and will stand a great deal of frost. Plantings made later than April will not prove very profitable, as they do not thrive in hot weather. In localities where frost does not occur until the middle of November, the quick-maturing sorts may be planted about the middle of September for a fall crop. Dwarf varieties can be planted in rows 1 to 18 inches apart, and the tall ones in rows 3 feet apart. When the planting is done during the cold months, the seed should be put down from 1 to 2 inches, and in the warmer months from 3 to 4 inches. In the garden the pods should be kept picked, as the plants will bear longer. The tall varieties will continue bearing much longer than the dwarf kinds.

HUNDREDFOLD—Extra early large podded. Sixty days from planting to the table. Tender and fine flavored. Vine 18 inches; pods four inches. Red, yellow and green, wrinkled.

(Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

LAXTONIAN—An early crop favorite used extensively by market gardeners for an early Fall crop. For your home garden you can plant no better. It matures within eight weeks. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

GRADUS—An early wrinkled pea of the finest quality, bearing large pods well filled with the sweetest peas. It produces a Telephone Pod as early as the very early sorts, therefore we are recommending it for a shipper to replace the Tall Telephone. In an experimental plot this Fall we had vines bearing as many as 10 large luscious peas in a pod. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

YORKSHIRE HERO—The ability of this pea to adapt itself to all conditions has made it a most popular variety in the Salt River Valley. It grows bushy, requiring no staking and yields abundantly. Pod is long and well filled with plump peas of delicious flavor. Our seed is selected by us in the field and is of the true acclimated stock. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

BLUE BANTAM PEAS

The Largest Podded Early Variety

Conceded the largest, the finest of all early sorts, and the seed we offer is acclimated. The Blue Bantam is of dwarf type, growing only 16 to 18 inches high and requiring no support. The pods are very large and of a dark green color, filled with 8 to 10 large delicious peas. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

SENATOR PEA—A second early sort bearing abundantly, large well-filled pods of good quality peas. It does not require staking. This variety is rapidly growing in favor among our customers. and our acclimated seed is without question giving results. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

PREMIUM GEM—A very fine wrinkled pea with vines about 15 inches high, pods long and produced in abundance. A very profitable market variety. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

STRATAGEM—A favorite on the Phoenix market. The pods are of a dark green color and remain firm several days after picking. A very strong grower, very prolific, pods of good size and well filled. Vines stand upright, require no stakes. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

TELEPHONE—A pole variety growing about four feet high. The peas are large and of a pale green color. The pods are very large, containing 8 to 10 peas each. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

DWARF TELEPHONE—A dwarf variety of the famous Telephone, bearing large, handsome pods of peas of the finest quality. An abundant bearer of long, broad, straight pods about 4½ inches long, well filled, frequently containing 9 to 10 peas; 1½ feet high. (Pkt. 10c), (½ lb. 20c), (1 lb. 35c), (10 lbs. \$3.00), postpaid.

Stratagem Peas

BUY THE BEST—WE DO

(Ants are very destructive. Kill them with Calcium Cyanide. See page 75)

PUMPKINS

CULTURE

Plant in March, July and August, seven to ten seeds in a hill and hills eight feet apart each way. Planted with corn they do well and yield an abundance of good hog and cow feed. One pound of seed will plant about 400 hills. Four to five pounds to the acre. Heavy fertilization will produce wonderful results.

SMALL SUGAR

SMALL SUGAR—This is the pumpkin from which the celebrated Yankee Pumpkin Pie is made. About 10 inches in diameter is its average size. Skin is deep orange yellow, with fine grained flesh; handsome and an excellent keeper. (Pkt. 5c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

MAMMOTH TOURS—Immense size, often weighing 100 pounds, oblong, skin green; good exhibition sort, or for stock feeding. (Pkt. 5c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

LARGE CHEESE—A very productive Pumpkin, shape flat, skin mottled, light green and yellow changing to a rich crimson color. Flesh yellow, thick and tender. The Large Cheese will yield as many tons per acre as most other larger varieties and it is a much better market type than the ordinary field varieties, therefore we recommend it for a general purpose pumpkin. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

JAPANESE PIE—A very valuable pumpkin of Japanese origin. The flesh is thick, of a rich salmon color, fine grained, dry and sweet. Very productive and highly desirable for pies or cooking. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

KENTUCKY FIELD—Large, round, flattened, hardy and productive. One to two feet in diameter. It has thick flesh of extra fine quality and is a splendid sort for family and market use as well as for stock feed. (Pkt. 5c), (¼ lb. 35c), (lb. \$1.00), postpaid.

IMPROVED CUSHAW—This is a very fine large, smooth pumpkin, having a small seed cavity and fine grained flesh. It is excellent for pies and yields enormously. (Pkt. 5c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

CONNECTICUT FIELD—The world-famous corn field pumpkin, grown principally for stock feed. The vines are of strong, vigorous growth and heavy bearers. Under favorable conditions the Connecticut Field will yield about 15 tons per acre. (Pkt. 5c), (¼ lb. 40c), (lb. \$1.25), postpaid.

HOLLOW CROWN PARSNIP

PARSLEY—Purijil

Parsley can be readily grown in Arizona by the use of a raised bed for Fall sowing. A light mulch will help to retain moisture, which will greatly aid in germinating the seed, as it is slow to start and cannot be covered deeply. One ounce of seed will produce about 500 plants.

MOSS or TRIPLE CURLED—Compact growing variety. Excellent for garnishing and flavoring. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), Postpaid.

PARSNIPS—Cheribia

Best sown during cold weather, October to March. Succeeds best in rich moist soil. Sow thickly in drills one foot apart and one-half inch deep. When the plants are two or three inches high thin to about four inches apart and cultivate same as carrots. One ounce of seed will sow about 100 feet of row.

HOLLOW CROWNED—(Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

(DON'T FAIL
FERTILIZE)

BUY THE BEST—WE DO

SEED POTATOES—Papas o Patata

Plant 600 lbs. to 800 lbs. to the acre

CULTURE

Potato planting in Arizona begins in the Southern valleys by January first and gradually works north until May first.

Prepare the ground by deep plowing, thoroughly pulverizing and fertilizing with well-rotted manure. A sandy loam, reasonably rich in organic matter, is considered the best soil for potatoes; however, any soil that is light and easily worked and contains a good supply of plant food will grow them successfully. Most of our soils lack proper bacteria for growing potatoes, and a green crop, preferably a legume, should be planted in the Fall and plowed under at least two or three weeks before potato planting begins.

Opinions differ as to how the potato should be cut. Seed should not be cut and permitted to lay but be planted at once. Best results have been obtained by cutting the average size potatoes in two or three parts, planting one piece in each hill.

We recommend planting about 3 or 4 inches deep and in hills 9 inches apart in 3-ft. rows. Potatoes should be cultivated frequently, but should not be irrigated until absolutely necessary. There should be enough moisture in the soil before planting to carry the plants well along until the tubers are about the size of a walnut. This is very important.

NOTICE

Potato prices are f.o.b. Phoenix. If they are wanted by mail, please add postage at zone rates. (See inside front cover). When ordering remit to us at the prices quoted here and we will fill your order at the market price prevailing the day it is received.

For 10- to 25-pound lots the parcel post rate is cheaper than express, but we recommend quantities of 50 pounds or more be sent by express or freight. If there is no agent at your station, please include prepay charges.

IRISH COBBLER

A very fine first early Potato of uniform size and good quality. Form oval and round, with a clean white skin and shallow eyes. Its strong growth, earliness, uniformity, large yield, fine quality and handsome appearance have made it a popular variety in all sections. (10 lbs. \$1.25), (25 lbs. \$2.50). Ask for quantity price.

SWEET POTATO SEED AND PLANTS

WRITE US FOR PRICES

BLISS TRIUMPH

A pink-skinned variety of extraordinary quality. Not the largest yielder, but it is the earliest potato we know of. The potatoes are of good size and of excellent quality. Under desert conditions, where moisture is not plentiful and a quick crop is necessary, the Triumph is very satisfactory.

(10 lbs. \$1.25), (25 lbs. \$2.50).

Ask for quantity price.

Semeson Bel for Disinfecting Seed Potatoes

For each 2½ gals. of water in the treating tub, have ready one pound of Semeson Bel. Sprinkle enough Semeson Bel into the water to cover its surface and stir it constantly until the disinfectant forms a white mush-like mixture or dip. Keep stirring and adding the Semeson Bel little by little until the required quantity is mixed into the water. The Semeson Bel mixture is then ready for the dipping of the potatoes.

RADISH—Rabano

CULTURE

Radishes may be sown any month in the year in any good garden soil. One ounce of seed will sow about 100 feet of drill, or a bed of 40 square feet.

By planting a small turnip variety and a long one at the same time a continuation may be had with fewer plantings. Sow in drills ten inches apart. An ounce of seed will plant 100 feet of drill, 10 pounds to the acre.

EARLY SCARLET GLOBE—Similar to the Scarlet Turnip, except that it is larger. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

EARLY SCARLET TURNIP—One of the earliest and best sorts for forcing; its color is very handsome; flavor very mild, crisp and juicy; stands a great amount of heat without becoming pithy. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

EARLY LONG SCARLET—Very brittle and crisp; color a bright scarlet; small top. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

CHINA ROSE—A delicious radish, crisp, with little tendency to become pithy. A beautiful coloring from light red at the top to almost pure white at the tip. It is a good seller and is in great demand by the vegetable peddlers. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

CALIFORNIA MAMMOTH—Pure white; the flesh is tender, sweet and crisp, keeps well. Plant from September 1 to January. (Pkt. 10c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

MIXED RADISH—This mixture, consisting of almost every known variety of radish, is deservedly popular throughout the country because it grows radishes suitable to each season and to every condition of soil. You are sure to have them early, medium and late; small, medium and large—something all the time. (Pkt. 5c), (oz. 15c), (¼ lb. 35c), (lb. \$1.00), postpaid.

LONG WHITE ICICLE RADISH

WHITE TIPPED SCARLET TURNIP—An early variety, of medium size and excellent flavor, and of a very handsome appearance. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

LONG WHITE ICICLE—For the home garden we consider this a most excellent table variety. Its extreme earliness, beautiful pure white appearance, excellent flavor and crispness should make it a favorite everywhere. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

PICTURE RADISH—Ready for the table within three weeks; always crisp, a delightful relish. The small round red and white radishes make a pretty showing. (Pkt. 5c), (oz. 20c), (¼ lb. 50c), (lb. \$1.75), postpaid.

CRIMSON GIANT—A variety combining earliness and great size. It grows much larger than other extra early varieties, but does not become pithy, even when twice as large in diameter and a week older. We recommend it highly. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

FRENCH BREAKFAST—A splendid variety, medium sized, olive-shaped, very crisp and tender; of a beautiful scarlet color. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

CHARTIERS—A distinct, exceedingly handsome and attractive sort; color white at the tip. Attains a large size before it becomes unfit for the table. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

JAPANESE WINTER RADISH—This was introduced in the same manner as the Japanese Summer Radish, which it resembles except in size. It is more crisp and of better flavor in the winter season. It is pure white, grows about eight inches long and not as tapering as the larger one. (Pkt. 10c), (oz. 25c), (¼ lb. 85c), (lb. \$2.50), postpaid.

ROUND BLACK SPANISH—Skin black, flesh white, of firm texture. (Pkt. 5c), (oz. 15c), (¼ lb. 45c), (lb. \$1.25), postpaid.

WHITE TIPPED SCARLET TURNIP

(Use Calcium Cyanide for Killing Ants—See page 75)

BUY THE BEST—WE DO

SQUASH—Calabaza

CULTURE

The squash is very tender; it is destroyed by frost, and the seed is apt to fail in cold ground; therefore it should not be planted until all danger of frost is past. Plant in hills five feet apart for bush varieties, and six to eight feet apart for vining varieties, putting six to eight seeds in a hill. When plants are strong, thin to three in a hill. Of the bush varieties, one ounce will plant 40 hills, and of the larger seeded sorts, about 15 hills. Two to three pounds to the acre.

ITALIAN or ZUCCHINI SQUASH

GOLDEN HUBBARD—Similar to the Green Hubbard except in color, which is a deep orange. Flesh deep golden yellow, fine grained; cooks dry and is of excellent flavor. (Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

FORDHOOK—One of the best late Summer varieties. Will keep well for months if stored in a cool, dry place. Thick skin of a bright yellow color; heavy meat that can be used at any stage of growth; fruits oblong in form, 8 to 10 inches in length; slightly ridged. (Pkt. 10c), (oz. 20c), (¼ lb. 60c), (lb. \$1.75), postpaid.

SQUASH—SUMMER CROOKNECK

MAMMOTH SUMMER CROOKNECK—A small, crook-necked Summer squash; skin bright yellow, covered with warty excrescences. Very early, productive and of excellent flavor. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

MAMMOTH CHILI—Grows to immense size, often weighing over 200 lbs.; very productive. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$2.00), postpaid.

PIKE'S PEAK—An old variety that deserves all the good things that are said about it. It is preferred to any other by those who know it. Good keeper and excellent for pies. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

WHITE BUSH SQUASH

EARLY WHITE BUSH SCALLOPED

The most popular squash because of its earliness and productiveness; skin and flesh a light cream color. A general favorite. (Pkt. 10c), (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

IMPROVED HUBBARD

IMPROVED HUBBARD—Best Winter variety, vigorous and productive. Fruit large, weighty, moderately warted, hardshell; color dark bronze green. A fine-grained, thick, dry, richly flavored, orange yellow flesh. Baked it is similar to and as luscious as a sweet potato. (Pkt. 10c), (oz. 20c), (¼ lb. 45c), (lb. \$1.25), postpaid.

ITALIAN or SUCCHINI SQUASH

ITALIAN or ZUCCHINI SQUASH—Is a bush variety and should be planted five feet apart. It should be used when quite young. When stewed it has a rich, creamy flavor not equalled by another squash. Some gardeners have made considerable money making a specialty of it. For the family garden we would recommend its use instead of the small white bush scallop, because of the excellent flavor and it is much more prolific. Try a packet or an ounce and be convinced of the delicious flavor. (Pkt. 10c), (oz. 20c), (¼ lb. 65c), (lb. \$2.00), postpaid.

Protect Your Crops From Insect Pests

Pumps and Dusting Machines.

BUY THE BEST—WE DO

(Use Nico Dust or Black
Leaf 40 for Plant Lice)

SPINACH

Should be planted in drills 12 to 18 inches apart, and for a succession every two weeks; as it grows, thin out or use, keeping clean of weeds. Sow from September 1 to April; one ounce of seed to 100 feet of drill; 20 pounds to the acre.

PRICKLY SEEDED WINTER—A splendid Fall or Winter variety, thriving in the coldest weather. It is the leading sort for market gardeners in the Salt River Valley. (Pkt. 5c), (¼ lb. 20c), (lb. 60c), postpaid.

NEW ZEALAND—For greens in the Summer and Autumn this variety is making a fine record in the Salt River Valley. We have several reports of its having grown through the entire Summer, maintaining a rich green color until the top growth is killed by frost. Roots allowed to stand until Spring will give new growth. (Pkt. 10c), (oz. 20c), (¼ lb. 50c), (lb. \$1.50), postpaid.

BLOOMSDALE—A valuable variety which is being more extensively grown each year. Upright in growth, producing a cluster of large thick leaves. Several crates were shipped East

with lettuce the past season, and it brought top-notch prices. We recommend it highly. (Pkt. 5c), (¼ lb. 20c), (lb. 60c), postpaid.

RHUBARB

In the higher altitudes sow the seed any time from March 1 to July 1, in drills two feet apart. Transplant at any time when the roots are large enough.

CRIMSON WINTER—Price: (Pkt. 10c), (oz. \$1.60), (¼ lb. \$5.00), (lb. \$16.00), postpaid.

SALSIFY

Sow the seed in February and March in drills one foot apart and one inch deep, thinning out plants to four inches. One ounce of seed will plant 50 feet of drill.

MAMMOTH SANDWICH ISLAND—A large and superior variety, mild and delicately flavored. (Pkt. 10c), (oz. 25c), (¼ lb. 85c), (lb. \$2.50), postpaid.

PLANT A GARDEN

Here is a fair example of what may be accomplished with a backyard garden. Besides supplying the family table with fresh vegetables, this garden returned a net profit of more than \$100.00 for one-half the year and furnished green feed for a pen of hens that have paid for

their keep and kept the family supplied with eggs for a year. One hour a day will care for a garden this size, and it will be healthful exercise for all members of the family. Get the garden spirit. Be self-supporting. Plant a Garden.

(Ask your neighbors if they desire our Catalog. We will gladly mail it on request)

BUY THE BEST—WE DO

TOMATOES—Tamata

PHOENIX SPECIAL

PHOENIX SPECIAL TOMATO

This grand Tomato was introduced into the Salt River Valley several years ago, and has constantly grown in popularity until it is today one of the tried and true varieties in most every market garden. The color is a bright purple scarlet, almost globular in shape, slightly flattened at stem and blossom ends. It is very productive and quite early, producing large fruits which are protected from the sun by ample foliage, thus eliminating the loss of so many fruits from sun scalding. (Pkt. 10c), (oz. 50c), ($\frac{1}{4}$ lb. \$1.75), (lb. \$5.00), postpaid.

CULTURE

Tomatoes do best on light, warm, not over-rich soil, and success depends upon securing a rapid, vigorous and unchecked growth during the early part of the season. Sow in hot beds from 6 to 8 weeks before they can be set out of doors, which is when danger from frost is past.

Transplant three to six feet apart in rows four to six feet apart, according to variety—three feet for those varieties of upright growth, as the Dwarf Champion, and six feet is not too far apart for vining varieties which will soon cover the ground solidly. The soil should be plowed and pulverized to a depth of 10 or 12 inches, the deeper the better, in order that the roots may keep in the cool earth for as soon as the roots are heated by the hot, dry soil near the surface, the plant quickly sickens and dies, and the grower can see no cause for it. We recommend the Earlianna for an early market tomato. One ounce of seed should produce 2,000 plants.

ARIZONA EXTRA EARLY TOMATO

In listing this wonderful Tomato we are introducing what we believe will be one of the earliest tomatoes on the market. Aside from the fact that it is an extra early tomato, it is far superior to many of the early varieties in color, size, shape and sturdiness. Market gardeners who are looking for something early, of good even size and a heavy bearer should not overlook this wonderful tomato. As a home garden variety it cannot be equalled.

(Pkt. 10c), (oz. 50c), ($\frac{1}{4}$ lb. \$1.75), (lb. \$5.00), postpaid.

BUY THE BEST—WE DO

(Plant our Mammoth Zinnias
See pages 51-52)

TOMATOES—Tamata

MORSE'S SPECIAL EARLY, No. 498

A SOLID RED TOMATO

Without a question this is the best extra early tomato ever offered for home garden, market garden or shipping. Unlike most early strains the foliage grows well to the center of the plants, protecting the fruit from sunburn. The fruit is deep red, very smooth and almost globular. Flesh very firm, free from core and contains very few seeds. Size and shape just right for packing and the tough skin makes it carry well and peel easily.

(Pkt. 10c), (oz. \$1.25), (¼ lb. \$3.50), (lb. \$10.00), postpaid.

PONDEROSA or BEEFSTEAK—A very large, purple tomato with few seeds and of excellent flavor. Our strain is round and smooth—not the usual oblong wrinkled kind. It is a favorite for the home garden, for which purpose we have on hand from March 1 until June extra fine, large, strong transplanted plants. (Pkt. 10c), (oz. 70c), (¼ lb. \$2.25), (lb. \$7.00), postpaid.

PONDEROSA or BEEFSTEAK

JUNE PINK—The most popular extra early tomato grown in the South and East. It is very prolific. (Pkt. 10c), (oz. 40c), (¼ lb. \$1.35), (lb. \$4.00), postpaid.

LIVINGSTON'S BEAUTY—A large purple scarlet tomato, producing fruits in clusters of 4 to 6, is large, of perfect shape and retains its size until late in the season. It ripens early, has firm flesh, of excellent quality, and the seed cells are very small. For shipping it may be picked quite green; will ripen up nicely and keep in perfect condition for a week after becoming fully ripe. (Pkt. 10c), (oz. 50c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

MORSE'S NEW STONE—The largest, bright red, perfectly smooth, highest yielding, best keeping, finest flavor, main crop variety. Growers everywhere recognize the merit of the New Stone. It is now 25 years since it was introduced and it is still growing in favor. Skin is bright scarlet, perfectly smooth and tough enough to stand shipment. (Pkt. 10c), (oz. 75c), (¼ lb. \$2.50), (lb. \$7.50), postpaid.

SELECT ACME—One of the best early purple fruited tomatoes. It is a very prolific sort. Fruits are produced in clusters of four to five; are of medium size and free from cracks. They are solid, and will stand long distance shipping.

The quality is fine. (Pkt. 10c), (oz. 45c), (¼ lb. \$1.25), (lb. \$4.50), postpaid.

CHALK'S EARLY JEWEL—A bright scarlet tomato, thick flesh, solid, of medium size, and very fine flavor. One of the best cropping medium early varieties. (Pkt. 10c), (oz. 40c), (¼ lb. \$1.35), (lb. \$4.00), postpaid.

DWARF STONE—The fruits are larger than those of the Dwarf Champion, and nearly as large as the original Stone. It is very prolific, smooth, and ripens early. The color is bright red. On account of its erect habit of growth plants may be set as close as 18x24 inches. (Pkt. 10c), (oz. 60c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

DWARF CHAMPION—Commonly called the Tree Tomato. Quite early, fruits medium large; color purplish pink and always round and smooth. (Pkt. 10c), (oz. 50c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

EARLIANA—A very popular extra early red, of compact growth. Yields well and the fruit is solid and of fine quality. (Pkt. 10c), (oz. 50c), (¼ lb. \$1.65), (lb. \$5.00), postpaid.

EARLIANA

Small Fruited Tomatoes

EXCELLENT FOR PRESERVES

HUSK TOMATO—Plants of low spreading growth and immensely productive. The small fruits are each enclosed in a husk. They are highly esteemed for preserves or pies. (Pkt. 10c), (oz. 75c), postpaid.

RED CHERRY—Small fruits of bright scarlet, borne in clusters. They are very productive and of fine quality. (Pkt. 10c), (oz. 75c), postpaid.

YELLOW PEAR—This is a leading favorite for preserves. The fruit is bright yellow and pear-shaped. The flavor is rich and distinct. (Pkt. 10c), (oz. 75c), postpaid.

TURNIPS—Nabo

PURPLE TOP GLOBE

PURPLE TOP STRAP LEAVED—More generally planted than any other variety. It is a quick grower; the flesh is very fine grained and sweet flavored. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

SNOWBALL—Medium size, round turnip; pure white, very fine flavor. (Pkt. 10c), (¼ lb. 35c), (lb. \$1.00), postpaid.

CULTURE

Sow from September 1 to March 1, broadcast if in loose loamy soil, otherwise in drills ten inches apart and cultivate. One ounce of seed will plant 75 feet of row, or three pounds will broadcast an acre.

RUTABAGA, PURPLE TOP, YELLOW—The best variety of Rutabaga in cultivation; hardy and productive; flesh yellow and well flavored; shape slightly oblong; color deep purple above and bright yellow under the ground. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

PURPLE TOP GLOBE—This is one of the handsomest and most salable turnips. Very desirable for either home or market gardens. It is large, globular shaped; flesh pure white; crisp and tender. On account of its shape it will outyield any other crop and is always a sure cropper. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

WHITE EGG—Of very rapid growth; solid, firm, fine-grained flesh of sweet, mild flavor. It grows to a good size, and is excellent, early or late. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

EARLY WHITE FLAT DUTCH—A most excellent early garden variety. Medium-sized, flat; color white, very early; sweet and tender. It is desirable for table use when small. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

GOLDEN BALL—Rich, sweet, yellow flesh; of quick growth and keeps well. (Pkt. 5c), (oz. 20c), (¼ lb. 35c), (lb. \$1.00), postpaid.

VEGETABLE PLANTS AND ROOTS

Owing to the expense of packing small plants for shipment by mail or express, we must request that your order for plants amount to not less than one dollar.

On account of the perishable nature of plants, subject to delay in transit and quarantine regulations, we prefer to deliver all plants at the counter in our store, but when necessary to send via mail or express, it must be understood that we do so at the buyer's risk.

We do not ship plants C. O. D.

ASPARAGUS ROOTS

WHY NOT HAVE AN ASPARAGUS BED?

The arid Southwest is admirably adapted to the growing of asparagus. Every back-yard garden should have a small bed of it. It is no trouble to grow and it's mighty fine eating in the Spring of the year. Set plants in rows two feet apart and about ten inches apart in the rows, or about 100 plants to 10x20. If 2-year-old plants are planted, tips may be cut the second year. Set the plants early in trenches 8 or 10 inches deep and fertilize well. In the Fall, after frost, cut the dead tops and mulch heavily. Roots in stock from January 1 to June 1. Price, 2-year-old roots, (per doz. 50c), (\$3.00 per 100), postpaid. Write for quantity price.

CABBAGE PLANTS—We have early and late varieties of cabbage plants from September 15 to June 1. Prices here are postpaid. (Doz. 25c), (100, \$1.00). Write for quantity prices.

CAULIFLOWER PLANTS—Our cauliflower plants are grown from our best acclimated seed. We have them from about October 1 to April 15. (Doz. 35c), (100, \$1.25), postpaid.

EGG PLANT—We have these only during the Spring season, about March 15 to June 1. On receipt of plants they should be put in water and revived before transplanting. (Doz. 35c), (100, \$2.00), postpaid.

PEPPER PLANTS—Chinese Giant, Anaheim Chili and Pimiento ready about March 1. (Doz. 35c), (100, \$1.50), postpaid.

SWEET POTATO PLANTS—These are ready usually about April 1 and we have them until June 15. In ordering more than 100, it is best to have them sent by express. (Doz. 25c), (100, \$1.00), postpaid. Please write for prices on larger quantities.

TOMATO PLANTS—Our stock of tomato plants is grown from our acclimated seed and they are good producers. We have early and late varieties, but recommend our Phoenix Special. (Doz. 25c), (100, \$1.00), postpaid. Write for quantity prices.

RHUBARB ROOTS—Crimson Winter—A very large growing sort and of excellent quality. Two-year-old roots, (20c each), \$2.00 per dozen, postpaid.

BUY THE BEST—WE DO

(Use NICO DUST for Plant Lice—See page 74)

LAWN SEED

Level the ground carefully, pulverizing all lumps and removing all stones. Enrich with Gro-more fertilizer at the rate of one pound to 20x20 and rake it in. Scatter the seed evenly over the surface at the rate of two pounds to 10x10 for Australian Rye, one pound to 10x20 for Blue Grass and one pound to 500 square feet for Bermuda Grass, then apply a mulch of sand or well rotted fine manure. Water carefully and regularly, not allowing the surface to dry out until the grass is up. In the Salt River Valley and similar climates, Australian Rye Grass should be planted from September 15 to March 1 and Bermuda Grass during the Summer months.

AUSTRALIAN RYE GRASS

This is the most popular grass in the Southwest for a winter lawn. Plant two pounds to 10x10 feet, from September 15 throughout the Winter. Prepare a fine seed bed, sow the seed and rake in very lightly, and then spread a thin mulch of fine decomposed manure over the surface. Keep well-watered with a fine spray.

AUSTRALIAN RYE GRASS—(Lb. 30c), (10 lbs. \$2.50), (25 lbs. \$5.50), postpaid.

Write for quantity prices.

WHITE CLOVER

Strictly first-class seed, clean and pure, of the highest quality. Used for a mixture in the Fall and Winter lawn. Plant one pound to 2000 square feet.

WHITE CLOVER—(Lb. 80c), (10 lbs. \$7.00), postpaid.

BERMUDA GRASS

Selected from our very best fields and thoroughly re-cleaned. Requires three weeks under favorable conditions to germinate. A light mulch of pulverized manure and frequent watering will greatly aid germination. Plant one pound to 500 square feet.

BERMUDA GRASS—(Lb. 75c), (10 lbs. \$6.00), postpaid.

KENTUCKY BLUE GRASS

A suitable lawn for the higher altitudes and mountain districts of the Southwest; also used in warmer sections for Winter lawns. Sow one pound to 200 square feet.

KENTUCKY BLUE GRASS—(Lb. 65c), (10 lbs. \$6.00), postpaid.

WINTER LAWN—CAPITOL BUILDING, PHOENIX, ARIZONA

PLANT A WINTER LAWN AND BEAUTIFY YOUR HOME SURROUNDINGS

Insist on our perfected strain of **Australian Rye Grass Seed.**

We have a full carload of high germinating quality seed to meet your requirements each season. You will be assured of A **SPLENDID GREEN LAWN** by placing your orders with us.

(We carry a full line of Lawn Supplies. See page 71)

BUY THE BEST—WE DO

INTRODUCING THE NEW

ARIZONA CROPPER STRAIN

After careful selection and close attention to seed stock, we are offering a new superior strain in **MILO MAIZE**, **HEGARI**, and **JUNE CORN** which we have named the **ARIZONA CROPPER STRAIN**. Our seed has been taken from carefully rogued fields of high quality as well as high quantity production. You will find in growing crops from these seeds higher yields than you are accustomed to, as well as pure type grains instead of mixtures which are somewhat prevalent in most seed stocks offered.

ARIZONA CROPPER MAIZE**THE GREATEST GRAIN SORGHUM**

ARIZONA CROPPER MAIZE is a new distinct strain of highly selected and field rogued maize. It should be planted at the rate of $2\frac{1}{2}$ to 3 pounds to the acre in drills 3 feet apart. Planting this quantity requires two seeds to be dropped every 24 inches, which distance will allow for stooling. The usual custom is to plant with a lister, on previously irrigated land, with sufficient moisture to germinate the seed. The first cultivation may be with a harrow, to be followed later by an implement that will gradually fill the lister row and leave a dust mulch.

This seed has been rogued in the field, selected, re-cleaned and thoroughly screened, thereby eliminating all small, imperfect and immature seeds.

The common tendency is to plant too much seed per acre, therefore we urge you to follow these directions closely and obtain maximum results.

(Per lb. 15c), (5 lbs. 50c), (10 lbs. 80c), (50 lbs. \$3.50), (100 lbs. \$6.00),

Express or postage extra.

ARIZONA CROPPER DWARF MILO MAIZE**FIELD ROGUED**

ARIZONA CROPPER DWARF is our new strain of Dwarf Milo Maize. This is a heavy producing, highly selected strain growing waist high and very uniform, thereby making a crop which is easily harvested. By listing 3 pounds to the acre it produces large well-filled heads that give us the maximum yield we are all looking for. Our method of thoroughly re-cleaning and screening our seed stock eliminates all small and immature seed. **Arizona Cropper Dwarf** should be planted and cultivated in the same manner as our famous Avondale Milo Maize.

(Per lb. 15c), (10 lbs. \$1.00), (50 lbs. \$4.50), (100 lbs. \$8.00),

Express or postage extra. See inside front page for zone rates.

ARIZONA CROPPER HEGARI**GRAIN, FORAGE AND SILAGE COMBINED**

OUR ARIZONA CROPPER HEGARI IS CAREFULLY GROWN, SELECTED AND RECLEANED FOR SEED

Hegari is one of the most reliable and profitable crops for the Arid Southwest.

Our new strain is slightly shorter than ordinary Hegari, giving a proportionately larger head development.

Unlike most other grain sorghums, Hegari not only produces a heavy crop of grain, but because of the sweet, juicy stalk and foliage it has the added feature of making good pasture or roughage and excellent silage. The heads mature in about 115 days from planting and the stalks remain green much longer, making excellent forage, which all kinds of stock relish and which they will eat to the ground. The average grain yield of Hegari seems to be about 3,000 pounds of threshed grain per acre, and we think with our selected seed and good cultivation that this yield may be materially increased. Hegari grows about five feet high, produces a long, well-filled, white head, resembling Milo Maize. It should be planted in rows three feet apart at the rate of three pounds to the acre. It is drought-resistant, but will respond wonderfully to cultivation and irrigation.

Our seed is grown from head selected stock and is systematically rogued in the field. The cost of planting **ARIZONA CROPPER HEGARI** is very small, and taking yield into consideration, it would be expensive to plant any other.

(Per lb. 15c), (5 lbs. 50c), (10 lbs. 80c), (50 lbs. \$3.50), (100 lbs. \$6.00),

Postage or Express extra. See inside front cover for zone rates.

ARIZONA CROPPER ALFALFA SEED

Superior to All Others
Quantity prices and samples on request

CHILIAN or COMMON ALFALFA

This variety has been grown in Arizona for years and is too well known to require description. Fifteen pounds is usually sufficient to plant an acre. If planted in the fall, September and October are the best months for planting, and February and March the best months for spring planting.

(Prices postpaid, Fancy seed, 1 lb., 35c; 10 lbs. \$3.00). By express or freight, 25 lbs. \$6.25; 50 lbs. \$11.50; 100 lbs. \$22.00.

HAIRY PERUVIAN ALFALFA

HAIRY PERUVIAN possesses all the good qualities of other alfalfas and in addition is a very heavy producer. The stems are covered with a hairy-like growth, from which it gets its name. This growth, it is claimed, protects the stem in frosty weather, thereby making possible a continued growth very late in the season and an early growth in the spring.

(Price postpaid, Fancy seed, 1 lb. 35c; 10 lbs. \$3.00). By express or freight, 25 lbs. \$6.25; 50 lbs. \$11.50; 100 lbs. \$22.00.

CYCLONE SEEDER

Thirty to 40 acres of alfalfa, millet, etc., can be sown in a day with this little machine. It broadcasts evenly and can be used with perfect success.

Each, \$2.60, postpaid.

MACABEE GOPHER TRAPS

The most popular trap in the market. Made of strong steel wire.

Each, 25c; Per dozen, \$2.75.

FIELDS PEAS AND BEANS

Quantity prices and samples on request

WHIP-POOR-WILL COW PEAS

As a soil renovator and a fertilizer, ideal for orchards and summer cover crop. They should be planted at the rate of thirty pounds to the acre, in rows three feet apart.

Price—(1 lb. 25c), (10 lbs. \$2.00), postpaid.

BLACK-EYED PEAS

This variety does exceptionally well in this section. It is easy to grow and produces dry peas and more vines than any other variety. Makes valuable hay crop and cannot be excelled for turning under for fertilizer.

Price—(1 lb. 25c), (10 lbs. \$2.00), postpaid.

Write for quantity prices.

SWEET CLOVER

(Melilotus Alba)

or WHITE BLOSSOM SWEET CLOVER

SWEET CLOVER is used for hay, pasture and green manure as well as fertilizing and renovating worn-out and alkaline soils. It may be killed when desired by mowing when in bloom. Sow in the Spring or Fall at the rate of 20 to 25 pounds to the acre. (Scarified Seed, (per lb. 30c), (10 lbs. \$2.50), postpaid. Write for quantity prices.

(Plant a garden—and know the true worth of fresh vegetables)

CANADIAN FIELD PEAS

In this section Canadian Field Peas will grow throughout the winter. They make a wonderful hay crop and should be cut when just forming pods. Plant 40 pounds to the acre.

Price—(1 lb. 25c), (10 lbs. \$2.00), postpaid.

PINK BEANS or FRIJOLES

This is a common commercial bean of the Southwest. More of this variety is handled on the markets in Arizona than all other varieties together. It is very drought-resistant, yields heavily, and is the best variety that can be grown under irrigation in this state. Plant 25 to 30 pounds to the acre.

Price—(1 lb. 25c), (10 lbs. \$2.00), postpaid.

MELILOTUS INDICA

(Sour Clover)

A Clover NATIVE to the Salt River Valley

MELILOTUS INDICA is the best legume with which to build up your soil. It is easily plowed under and very rich as a fertilizer. As a cover crop in citrus groves it has no equal. We offer only the best quality, thoroughly re-cleaned and scarified seed. (Per lb. 25c), (10 lbs. \$2.00), postpaid. Write for quantity prices.

BUY THE BEST—WE DO

MISCELLANEOUS FIELD SEEDS

Quantity prices and samples on request

WHEAT

EARLY BAART WHEAT—The best strain of milling wheat. Plant from October to March. Yields very heavily.

CLUB WHEAT—The most popular soft spring wheat. Many planters claim greater yields than from any other strain. This wheat is beardless.

SONORA WHEAT—Another popular spring beardless wheat. The long heads make it resist smut and rust. Sonora Wheat can be planted the latest of all varieties.

BARLEY

After three years of experiments we are offering **BEARDLESS** Barley for pasture crop. We have found this barley to grow faster than the Bearded variety; to produce more tonnage because of wider and thicker leaves, and to be more succulent and edible to stock because of the entire lack of beards. We recommend **Beardless Barley** for pasture unqualifiedly. For grain crop the old bearded variety has yet to be beat, since beardless does not make a profitable yield of grain.

Write or ask for prices and quantity to plant.

OATS

We offer four grades of Seed Oats: **Local Grown White Oats** and **Local Grown Red Oats** for hay and pasture purposes; **Imported Texas Red Rustproof Oats** and **Imported Nebraska White Oats** for grain crops. We suggest **White Oats** for early planting but **Red Oats** undoubtedly do better for spring planting.

Prices on application.

ALGERIA

A new grain. Rivals our Hegari, only that it produces more grain. Heads are from 12 to 18 inches and weigh as high as two pounds each. Stalks grow from 4 to 5 feet high. Live stock will eat the entire stalk with relish and will seek it out from among other grain. Plant from 4 to 6 pounds to the acre.

Prices on application.

SWEET SORGHUMS

FOR SYRUP AND FOR FORAGE

MAKE YOUR OWN SYRUP

The sweet sorghums are distinguished from the grain sorghums by the fact that the juices are very sweet and sugary and the substance of the stem is very digestible. The juices are used for making syrups, and they are also planted for forage. We recommend planting for syrup, as small syrup mills are operating in various sections.

HONEY DRIP SORGHUM

This is a variety that is most popular as a syrup cane. It has long, slender, reddish heads and grows to a height of 8 to 12 feet, producing a heavy tonnage. It is not particular as to soil. For syrup purposes plant in rows far enough apart to allow cultivation. It requires about 10 pounds of seed to the acre planted in this manner, or 40 broadcast. Price, (Lb. 25c), (10 lbs. \$2.00), postpaid. Ask for quantity price.

TEXAS SEEDED RIBBON

Another of the sweet sorghums and one very commonly used for syrup. The seed we have is the crookneck strain. (Lb. 25c), (10 lbs. \$2.00), postpaid. Ask for quantity price.

DWARF ESSEX RAPE

Recommended as a pasture for sheep and hogs, furnishing fine pasture in six to eight weeks after planting. Rape is best sown in drills at the rate of five pounds per acre. (Lb. 30c), (10 lbs. \$2.50), postpaid.

SUNFLOWER

Single heads measure 15 to 20 inches in diameter, and contain an immense amount of seed, which is highly valued by poultry breeders as poultry feed.

(Lb. 35c), (10 lbs. \$2.50), postpaid.

GOLDEN MILLET

An excellent catch crop. May be planted as late as September 15 in the Salt River Valley and still produce a good crop of hay. Sow 30 pounds per acre.

(Lb. 25c), (10 lbs. \$2.00), postpaid.

WINTER RYE

Grown here only as a winter pasture crop since it does not make grain profitably. We cannot recommend Rye very highly for pasture since barley or oats consistently out-produce it. Prices on application.

VETCH

Sow 40 pounds per acre with grain. Is hardy and makes a fine winter growth. Largely planted in the orange groves of the South for green manure, and plowed under in the spring.

(Lb. 25c), (10 lbs. \$2.00), postpaid.

Write for quantity prices.

PEANUTS

A valuable soil renovator to sow in young orchards as a pay crop until the orchard comes into bearing.

SPANISH HULLED.....Lb. 35c; 10 lbs. \$3.00

VIRGINIA BUNCH.....Lb. 30c; 10 lbs. \$2.50

Postpaid to 1st, 2nd and 3rd zones.

EARLY AMBER

The most popular variety for hay and pasture purposes. It furnishes a large yield of most nutritious forage, being very rich in saccharine matter. If intended for hay it should be sown broadcast at the rate of 40 pounds per acre and cut when the seed is in the dough. When grown as a crop for seed, sow in drills 3 feet apart and cultivate. Planted in this manner, it requires 5 pounds of seed per acre. (Lb. 20c), (10 lbs. \$1.75), postpaid. Write for quantity price.

CLUB TOP CANE

This variety is very vigorous and produces a heavy growth of foliage. It stools readily and has proven an excellent variety for hog pasture. Club Cane has produced as much as 6 tons of hay per acre. Broadcast 40 pounds per acre. (Lb. 25c), (10 lbs. \$1.75), postpaid.

Write for quantity price.

BUY THE BEST—WE DO

(For FIELD CORN
see page 13)

GRASS SEEDS

SUDAN GRASS—For Pasture or Hay

For quick Summer pasture, Sudan Grass surpasses anything in the grass line. Planted as soon as danger of frost is over in the Spring, it may be pastured in forty to fifty days after planting and continuously thereafter until frost kills it in the Fall.

It is relished by all stock and as a milk producer has few equals. Broadcast it requires 30 pounds of seed to sow an acre. Our seed is produced outside the Johnson Grass belt and is first-class in every respect. (Per lb., postpaid, 25c), (10 lbs., postpaid, \$2.00). Ask for quantity price.

RHODES GRASS

An Australian grass which grows readily on sandy or light soils. Grows thickly, producing from 5 to 10 tons of fine quality hay. It is very palatable to stock, easily eradicated when desired and very highly recommended by farmers who have grown it. (1 lb. 85c), (10 lbs. \$7.50), postpaid.

BROME GRASS—*Bromis Inermis*

A WONDERFUL DROUTH RESISTANT GRASS

Recent experiments are proving that this grass is most satisfactory in all localities where arid soils demand a plant that will stand the drouth. Its nature is to stool and it seldom produces seed the first year. It has proven an excellent pasture grass for general range purposes. (Lb. 60c), (10 lbs. \$5.50), postpaid. Write for quantity price.

BERMUDA GRASS

May be used for pasture or for lawn in Southern climates. Most everyone is familiar with this grass. It requires three weeks under favorable conditions to germinate Bermuda Grass and it should be kept thoroughly soaked during that time. Insufficient water will simply start the seed and kill the tiny roots before the plant can establish itself. Be careful about this. Plant for lawn 1 pound to 500 square feet. (Lb. 75c), (10 lbs. \$6.00), postpaid. Write for quantity price.

RED TOP PASTURE GRASS

Another pasture grass for the higher altitudes. Succeeds on all soils from moist to swampy land, making a permanent pasture, and furnishing a highly nutritious feed. Hulled seed. Sow 15 pounds per acre. (Lb. 45c), (10 lbs. \$4.00), postpaid. Write for quantity price.

TIMOTHY

Much Timothy is sown in our higher altitudes throughout the Southwest, where it is quite successful. We carry a stock of acclimated seed for this section and would be glad to send samples and quote prices on request. It requires 15 pounds per acre when sown alone. (Lb. 25c), (10 lbs. \$2.00), postpaid. Write for quantity price.

ORCHARD GRASS

A valuable pasture grass for the higher altitudes of Arizona; produces an immense quantity of forage and hay of the best quality. After being cut it comes up quickly and yields heavily. Sow 35 pounds per acre. (Lb. 50c), (10 lbs. \$4.50), postpaid. Write for quantity price.

A view of our Floral Department, where cut flowers are assembled by experts into the most effective bouquets, corsages, boutonnieres and floral pieces of every description.

FLORAL DEPARTMENT

AFFILIATED WITH THE "FLORISTS' TELEGRAPH DELIVERY"

In this beautiful bower you will find the most beautiful flowers of almost every clime. Through our affiliations in the various flower-producing centers, we can fill practically any special requirement on reasonably short notice.

We carefully execute telegraph delivery orders to all parts of the United States and furnish our customers with all available information as to the price and quality of flowers at the points of delivery.

Mail orders are promptly and expertly filled with the same painstaking care that characterizes the standard of service maintained by this establishment in every contact.

CUT FLOWERS must of necessity vary in price according to season, demand and supply, hence the following prices are merely given to provide an approximate scale to guide you in making your selections.

Prices for special floral pieces and decorations cheerfully furnished upon request and the expert counsel of our floral staff is at all times available to assist you in achieving the most desired effects at the most reasonable cost.

ROSES, American Beauty, May to November 1st—\$1.50 to \$3.00 per dozen.

ROSES, White, Red, Pink and Yellow—\$2.00 to \$10.00 per doz.

CARNATIONS, Lath House Grown—\$1.00 to \$2.00 per doz.

CARNATIONS, Hot House Grown—\$1.50 to \$3.00 per doz.

CHRYSANTHEMUMS in season—\$2.50 to \$10.00 per doz.

BEAUTIFY
YOUR HOME

FLOWER SEEDS

ENHANCE THE VALUE
OF YOUR PROPERTY..

There are no more satisfactory flowers than those grown from seed, especially the easily grown and brilliant colored annuals, but they require care and proper soil preparation, for flower seeds are delicate. Soil that will bake and crust should have a liberal mixture of well-rotted manure and sand. In adobe soil a few pounds of air-slacked lime will assist in forming a better texture. In sowing seeds of hardy annuals, plant all medium sized seeds at a depth of $\frac{1}{4}$ to $\frac{1}{2}$ inch. Sweet Peas should go deeper. Very fine seeds should be pressed into the soil and a little sand or fine, well-rotted manure sprinkled over the surface. Water more frequently if the seed is close to the surface, and if necessary protect with cheesecloth until the seed germinates. When up, the plants should be thinned from 2 to 12 inches, depending on the variety; otherwise they will be weak and spindling. It is a great mistake to leave plants too thick; give them room to develop, allow plenty of moisture and the display that can be produced from seed will surprise and delight the grower.

AGERATUM

(Floss Flower)

A hardy annual of easy culture, used for bed or borders. Blue Perfection, (Pkt. 10c).

AUSTRALIAN PEA VINE

(Dolichos Lignosis)

A rapid growing evergreen, climbing perennial; flowering freely in large clusters of rose flowers. For covering arbors, etc., they are excellent. (Pkt. 10c).

SWEET ALYSSUM

A fragrant hardy annual having the odor of honey and bearing spikes of small white flowers in great profusion throughout the Winter and Spring. Without a doubt the best white, yellow and lilac border plant; is also useful for beds and baskets and will begin to bloom when quite small.

LITTLE GEM—Grows 4 to 6 inches high. One of the finest for low beds and borders. (Pkt. 10c), ($\frac{1}{4}$ oz. 25c), (oz. 75c).

AMARANTHUS CAUDATUS

(Love Lies Bleeding)

Light yellowish-green, foliage long; drooping crimson flower spikes; grows three to four feet high. (Pkt. 10c).

ANTIRRHINUM

(Snapdragon)

Thrive in most any soil and do beautifully in Southern Arizona. Plant in the open where they are to remain. Mixed colors. (Pkt. 10c), (oz. \$1.50).

SWEET ALYSSUM

(Plant our Giant Zinnias
—See pages 50 and 51)

FLOWER SEEDS

A beautiful yard will enhance the value of your property and prove an asset to your neighborhood. It takes only a few packets of flower seeds and a little care and attention to grow an abundance of flowers for your table and to greatly beautify your home.

GIANT BRANCHING ASTER

CALIFORNIA POPPY

(Golden West)

A hardy annual, growing from 1 to 1½ feet high; sowing the seed in the Fall, it blooms beautifully during the Spring. Pure yellow and mixed. (Pkt. 10c), (oz. 50c).

CANARY BIRD FLOWER

A tender climbing annual of the Nasturtium family. Blossoms have curiously winged petals and are a light yellow. (Pkt. 10c), (oz. 75c).

CALENDULA

(Pot Marigold)

A very hardy annual growing about one foot high. Plantings may be made from September 15 to April. Flowers very early and is attractive as a border plant.

PRINCE OF ORANGE—A deep orange. (Pkt. 10c), (oz. 40c).

ORANGE KING (New)—Bears giant flowers sometimes 3 inches in diameter. Color pure orange. This is a pure strain of seed used by florists for growing cut flowers under glass. You will find this strain of seed a wonderful improvement over the ordinary Calendula. Try a packet.

(Packet 15c), (¼ oz. 35c), (ounce \$1.00).

"LEMON QUEEN"—Double, bright sunflower yellow. This variety is equally as popular as Prince of Orange, as the blooms are fully as large. Height, 18 inches. Price, 10c per packet; ounce, 50c.

(Perhaps your neighbor would enjoy our catalog—sent free on request)

ASTERS

Sow Asters in boxes in January and transplant to the open in March and April. By thorough cultivation excellent results may be obtained.

GIANT BRANCHING—The tallest and best cut flower variety. The plant grows about 18 inches high, and the blossoms, which are large and full-petaled, are borne on long stems or branches. We have it in the following colors: Crimson, Lavender, Pink, White and Mixed Colors. (Pkt. 10c), (¼ oz. 65c).

ANEMONE (WINDFLOWER)

Giant French Single Mixed—This lovely flower may be grown from seeds as well as bulbs. Our seed has been saved from an extra fine strain and contains a very choice mixture of colors. The seed may be sown in the fall or spring in the open ground. We suggest that the seed be covered lightly with sand, then spread a thin cloth over the bed and water through this. (Pkt. 10c).

BALLOON VINE

A climbing annual. The seed pods are curiously puffed, making the vine quite attractive. (Pkt. 10c), (oz. 40c).

BALSAM

(Lady's Slipper)

A tender annual growing about 12 inches high. Flowers are both single and double, in bright colors and variations. (Pkt. 10c), (oz. 75c).

BALSAM APPLE

(Momordica)

A climbing annual with graceful and ornamental foliage; yellow flowers and warted golden yellow fruits. (Pkt. 10c), (oz. 75c).

BEAN SCARLET RUNNER

A popular climber. Flowers scarlet. (Pkt. 10c), (oz. 15c).

CANNA

Mixture of the popular varieties, red and yellow flowers. (Pkt. 10c).

CARDINAL CLIMBER

A new climber of great merit, bearing a great mass of small crimson flowers. It grows to a height of 15 to 20 feet. (Pkt. 25c).

CALENDULA

BUY THE BEST—WE DO

FLOWER SEEDS

CALLIOPSIS

If the varieties of Calliopsis were rare and high priced, people would rave about their beauty, but as they are so cheap and easily grown, they are often passed by unnoticed. The lovely combinations of yellow and brown are not excelled in any other plant and they have an elegance and grace all their own. (Pkt. 10c), (oz. 50c).

CASTOR BEANS

Large-leaved varieties for shade; very ornamental. (Pkt. 10c), (oz. 15c), (lb. \$1.50).

CANDYTUFT

A hardy annual growing from six to eight inches high, according to the variety; of easy culture and valuable for bedding or massing.

Pure White—(Pkt. 10c); Pink—(Pkt. 10c); Scarlet—(Pkt. 10c); Mixed Colors—(Pkt. 10c), (oz. 50c).

CANDYTUFT

CANTERBURY BELLS

A hardy perennial, blooming the second year from seed, or the first year if sown early. Grows about three feet high. Mixed colors. (Pkt. 10c).

CARNATION

Cover the seed lightly and protect from the sun until established, then transplant 12 to 18 inches apart, where they are to remain.

MARGUERITE, Mixed Colors—This assortment gives a large percentage of fine double flowers. (Pkt. 15c), (1/4 oz. 50c).
White—(Pkt. 15c).

CENTAUREA CYANUS

(Corn Flower or Bachelor's Button)

This old-fashioned hardy annual is still a great favorite for cutting purposes. The deep rich blue is the most popular. The mixtures contain shades of pink, white, lavender and blue.
Double Mixed—(Pkt. 10c).

CENTURAU MOSCHATA

(Sweet Sultan)

A magnificent large flowered type, exquisitely fringed and delightfully scented. Fine for cut flowers. Mixed Colors. (Pkt. 10c).

COCKSCOMB—Celosia Cristata

A half-hardy annual, growing 6 to 8 inches high, bearing a wide, wavy blossom that resembles a cock's comb. In brilliant colors; fine for massing or border work.

Mixed. Several shades of red and yellow—(Pkt. 10c).

COBEA SCANDENS

A climber of rapid growth, beautiful fine foliage and a rich purple flower borne on long stems. (Pkt. 10c).

CELOSIA PLUMOSA

(Feathered Cockscomb)

Plumosa Mixed—A very fine selection of the popular feathered Celosia containing many pleasing shades of color varying from pale yellow to the deepest crimson. (Pkt. 10c).

CHINESE WOOLFLOWER

(Celosia Childsii). Plants grow two to three feet high, the bloom starting early with a central head, round and globular, which often reaches the immense size of two feet in circumference. Scores of branches are thrown out, each bearing a ball of scarlet wool. All these branches support numerous laterals with small heads of bloom mixed with fresh green foliage, so that a plant looks like an immense bouquet splendidly arranged and set in the ground. None of the blooms fade in any way until hit by frost.

New Pink, Pkt. 15c.
Crimson, " 15c.

CLARKIA

A hardy annual of easy culture growing about 18 inches high and bearing bright rose, white and purple flowers in great profusion; single and double mixed. (Pkt. 10c).

COREOPSIS

Grows luxuriantly in any situation, affording a constant supply of richly marked flowers for cutting. (Pkt. 10c).

FLOWER SEEDS

CHRYSANTHEMUM

CHRYSANTHEMUM

Coronarium
(Annual)

Double Mixed

Very showy mixture, containing the most popular shades.

(Pkt. 10c)

SHASTA DAISY

CYPRESS VINE

(Ipomea Quamoclit)

A tender climbing annual with soft, fern-like foliage and small star-like flowers; mixed. (Pkt. 10c).

DAHLIA

Sow seed in beds and transplant; double mixed. (Pkt. 25c).

DIDISCUS COERULEUS

(Blue Lace Flower)

This beautiful lace flower is a very attractive cut flower of a lovely blue shade and is most effectively used when mixed in bouquets. The culture is easy and being a hardy annual may be planted from early fall to early spring. If you like to raise your own cut flowers you will be glad to have this in your collection. (Pkt. 10c).

DOLICHOS

(Hyacinth Bean)

Tender climbing annual; purple waxy-like flowers are borne on long stems; sow in open ground in March. Mixed colors. (Pkt. 10c).

DIANTHUS

(Pinks)

Hardy annuals, about one foot high and bearing beautifully colored single and double flowers in profusion; Japan mixed. (Pkt. 10c), (oz. \$1.00).

COSMOS

New Mammoth Early Flowering—A tender annual with fine cut, feathery foliage and large showy blossoms. Cosmos should be planted more extensively than it is. It is a handsome cut flower, a good bedder and easily grown. We have the Crimson, Pink, White and Mixed Colors. (Pkt. 10c), (oz. 75c).

COSMOS—KLONDYKE

A gorgeous orange-yellow flower with very handsome foliage, more coarsely lacinated than others. (Pkt. 15c).

DOUBLE CRESTED COSMOS

The flowers are of good size, with full, double centers and an outer row or crest of broad ray-petals. This is the best of all Cosmos for cut-flowers. Mixed colors, (Pkt. 15c).

BUY THE BEST—WE DO

FLOWER SEEDS

AFRICAN DAISY

Dmorpheotheca Aurantiaca

(African Daisy)

A rare and extremely showy annual from South Africa, which is becoming a great favorite here on account of its easy culture and long blooming season. Its Marguerite-like blossoms are $2\frac{1}{2}$ to $2\frac{3}{4}$ inches in diameter, of a rich orange gold. Every Arizona garden should have these. (Pkt. 10c), (oz. \$1.25).

EVENING PRIMROSE

(Oenothera)

An attractive hardy perennial border plant of dwarf compact growth, producing an abundance of bright showy flowers in white, pale yellow, rose, etc.; of very easy culture; fine mixed. (Pkt. 10c).

DOUBLE DAISY

(Bellis Perennis)

A hardy perennial blooming freely during the early Spring and well into the Winter; white and mixed colors. (Pkt. 25c), (1-8 oz. \$1.00).

GERANIUM

A half hardy perennial flowering the first year from seed. (Pkt. 15c).

HUMULUS

or JAPANESE HOP

A rapid growing, climbing annual with dense foliage. Will grow 20 to 30 feet in a season. (Pkt. 10c), (oz. 50c).

KOCHIA TRICOPHYLLIA

(Mexican Fire Bush)

A splendid ornamental annual plant forming dense oval bushes 2 to $2\frac{1}{2}$ feet high, of small light green foliage, changing to fiery red in the Fall. Planted in March it does well here. (Pkt. 10c).

KUDZU VINE

A new climber of great merit. This is one of the fastest growers we know of, reaching a height of 20 feet in a short time. (Pkt. 15c).

RANUNCULUS

Very handsome double flowers, 10 inches high, about 2 inches across. Blooms the first year from seed. Plant during fall and winter months. (Pkt. 25c).

FLAX, SCARLET

A hardy annual, about $1\frac{1}{2}$ feet high, of slender and graceful appearance with bright red flowers which are borne in great profusion; very showy. (Pkt. 10c), (oz. 50c).

FOUR O'CLOCK

A hardy annual of easy culture, growing about two feet high; plant in March and April. (Pkt. 10c).

FOR-GET-ME-NOT

(Mysotis)

A hardy perennial growing 6 to 12 inches high; blooms the first year; sow in February. (Pkt. 10c).

HOLLYHOCK

HOLLYHOCKS

These stately, old-fashioned perennials are most striking when seen in groups or long rows against evergreen hedges, shrubbery, etc., and in their turn form a very fine background for plants of lower growth. (Pkt. 10c), (oz. \$1.00).

GAILLARDIA

Beautiful show plant blooming all through the Summer here. Excellent for beds, borders or for cutting. (Pkt. 10c), (oz. \$1.00).

GODETIA

A hardy annual 10 inches high, of compact growth, satiny cup-shaped flowers in deep red, pink and white; sow in October and it will bloom in the early Spring. Does well in Arizona. (Pkt. 10c).

GOURDS, MIXED

Strong climbing vines producing many odd shapes and ornamental gourds. (Pkt. 10c), (oz. 25c).

GYPSOPHILA

(Baby's Breath)

A hardy annual of easy culture. Grows 2 to 3 feet high, and bears a profusion of small star-shaped flowers. Very fine for bouquets. (Pkt. 10c), (oz. 60c).

BUY THE BEST—WE DO

(Try Castor Beans for quick shade)

FLOWER SEEDS

GLOBE AMARANTH

(Gomphrena Globosa)

An excellent everlasting or immortelle; flowers globe-shaped, purple, orange and variegated. Retain their shape and color when dried; are also good for cutting as fresh flowers. Height, 10 inches. Tender annual. Mixed, pkt., 10c.

LARKSPUR

DOUBLE STOCK FLOWERED LARKSPUR

Beautiful hardy plants with noble spikes of handsome flowers. Plant in October and November. We recommend it for Southern Arizona. We have these in separate colors of Purple, Dark Blue, White, Carmine Red, Rose Pink and Mixed. (Pkt. 10c), (oz. 75c).

LUPIN

One of our most attractive and easiest grown flowers. The plants grow 2 to 3 ft. high and have handsome spikes of flowers which are fine for cutting. If the plants are not allowed to go to seed they flower for several months in the spring. Mixed colors. (Pkt. 10c).

LINARIA

A pretty garden annual—sometimes called Baby Snapdragon because of its resemblance to snapdragons. They are easily grown and are exceptionally attractive as cut flowers. In this mixture are blue, rose, lavender, yellow, etc. Height, 2 feet. (Pkt. 10c).

LANTANA

Tender perennial growing from 2 to 3 feet high, bearing verbena-like clusters of flowers; sow seed in boxes in February and protect until after danger of frost is past, when they may be set in the open. (Pkt. 10c).

NEMOPHILA

A hardy annual growing about 6 inches high. The blossoms are cup-shaped and the colors are blue, white, lavender and spotted. The seed may be sown from October to March and is very valuable for carpet bedding and borders. (Pkt. 10c). March. (Pkt. 10c).

MORNING GLORY

TALL MIXED—The most rapid growing vine for Spring planting. Best Mixed. (Pkt. 10c), (oz. 25c).

JAPANESE FRINGED—A large flowering variety with beautifully fringed flowers. (Pkt. 10c), (oz. 50c).

DOUBLE MORNING GLORY—A beautiful Double Morning Glory. It makes a very fast growth of rich, luxuriant foliage. Will flower about 75 per cent double. (Pkt. 15c).

HELICHRYSUM

(Straw Flower)

A free-flowering, hardy annual, growing 4 or 5 feet high and bearing beautiful straw-like flowers in a great variety of shades and colors. (Pkt. 10c).

MIGNONETTE

Hardy annual growing 6 to 12 inches high; sow in the Fall or Spring. Very easily grown. (Pkt. 10c), (oz. 50c).

LOBELIA

Fine for bedding. Plants very compact, profusely covered with rich blue flowers. Plant in March. (Pkt. 10c).

FLOWER SEEDS

MOON FLOWER

This vine does beautifully in any part of Arizona in any position, be it sun or shade, making an enormous growth in a remarkably short time; large white flowers open in the evening. File or in some manner puncture the outer shell of the seed and soak in water 12 hours before planting. Blue or white. (Pkt. 10c), (oz. 75c).

MARIGOLD

A hardy annual in various shades. Planted after danger of frost is past, they will bloom here through the entire Summer.

Double Tall African Mixed—(Pkt. 10c), (oz. 75c).

Dwarf French Mixed—(Pkt. 10c), (oz. 75c).

NICOTIANA

OR

FLOWERING TOBACCO

A half hardy annual, growing 3 feet high, with slender tubular flower. Belongs to the tobacco family. Requires plenty of room in the garden.

Affinis—White, and very fragrant. Pkt. 10c.

PASSION FLOWER

A hardy perennial climber with lovely wax-like flowers. (Pkt. 10c).

PETUNIA

Sow seed from October to March; scatter thinly on an even surface and barely cover with sand or fine mulch. We recommend the following for Southern Arizona:

CHOICE FRINGED MIXED—(Pkt. 25c).

GOOD MIXED—(Pkt. 10c), (oz. \$1.25).

TALL AFRICAN MARIGOLD

POPPIES

The different varieties of poppies are always favorites for outdoor display and the cultivation of them being so extremely simple entitles them to a place in every garden in Arizona. Seed should be sown in the Fall where the plants are intended to flower.

CALIFORNIA—Pure yellow and mixed. (Pkt. 10c).

CARNATION FLOWERED DOUBLE MIXED—Choice assortment of brilliant colors. Flowers very double and well fringed. The plants grow to a height of 4 feet and bear immense carnation-like blooms 6 to 8 inches across. Annual. (Pkt. 10c), (oz. 50c).

SHIRLEY ANNUAL—The most charming poppy in cultivation. The blossoms are bright and showy and include an almost endless variety of colors, from pure white, pink, terra cotta, salmon, chamols and rosy carmine, to brilliant crimson, many of the flowers being beautifully flaked or edged with white. (Pkt. 10c), (oz. 50c).

GLAUCUM (Tulip Flowered)—Beautiful variety, producing flowers of the most vivid scarlet, effective for beds or masses. Annual. (Pkt. 10c), (oz. 50c).

PHLOX DRUMMONDI

A hardy annual suitable for borders, bearing beautiful and brilliantly colored flowers all Spring and well into the Summer. (Pkt. 10c), (oz. \$2.00).

BUY THE BEST—WE DO

(See page 41 for Sweet Pea and Zinnia Collections)

FLOWER SEEDS

PANSIES

We offer Pansies in the following separate colors. They have been selected with care in order to give a complete range of colors from which to choose. Wonderful color effects and an abundance of plants can be had from planting a few packets from the following:

BEACONSFIELD—Large purple violet. Top petals blue. (Pkt. 15c).

GIANT EROS or GOLD MARGINED—Velvety brown edged with golden yellow. (Pkt. 15c).

MAHOGANY COLORS MIXED—(Pkt. 15c).

PURE WHITE—Giant flowered. (Pkt. 15c).

GIANT YELLOW—(Pkt. 15c).

DEEP PURPLE—(Pkt. 15c).

GOOD MIXED—(Pkt. 15c), (¼ oz. \$1.25).

GIANT TRIMARDEAU MIXED—A very showy class of vigorous compact growth, flowers of an enormous size; finest strain. (Pkt. 25c).

PORTULACA

Beautiful dwarf plants, bearing glossy cup-shaped flowers in brilliant colors. A wonderful Summer plant.

SINGLE LARGE FLOWERING MIXED—(Pkt. 10c), (¼ oz. 50c).

DOUBLE LARGE FLOWERING MIXED—(Pkt. 10c), (¼ oz. \$1.00).

SINGLE PORTULACA

PANSIES

SALPIGLOSSIS

Highly ornamental, half hardy annual, bearing funnel-shaped flowers in striking colors. (Pkt. 10c), (oz. 75c).

SWEET WILLIAM

(Dianthus Barbatus)

A hardy perennial blooming the second year from seed. Grows one to two feet high and bears its flowers in clusters, at the end of a stiff stem. The individual flowers are handsomely colored and marked. It makes a beautiful bedding plant, and is of easy culture.

Single or Double Mixed—(Packet 10c).

SCHIZANTHUS

Very beautiful and interesting annuals. This is one of the earliest annuals to raise from seed. Sow in the open where plants are to flower. Exceptionally beautiful when in full bloom and literally covered with small orchid-like flowers. Mixed—(Packet 10c).

SALVIA SPLENDENS

(Scarlet Sage)

A tender perennial blooming the first season from seed. (Pkt. 10c).

NASTURTIUMS

MIXED NASTURTIUMS

May be sown in the Fall if near the house with south exposure, where they may be protected from the frost; otherwise plant in February or March.

TALL MIXED—(Pkt. 10c), (oz. 25c).

DWARF MIXED—(Pkt. 10c), (oz. 25c).

IVY LEAF—Mixed colors. (Pkt. 10c), (oz. 35c).

EMPRESS OF INDIA—Deep crimson, dark foliage. (Pkt. 10c), (oz. 35c).

A WONDERFUL FLOWER

NEW GIANT DOUBLE DAHLIA FLOWERED ZINNIA

We take pleasure in offering this beautiful type of flower which shows a marked distinction over other varieties of Zinnias, producing magnificent blooms greatly resembling the large decorative Dahlia. The plants are very strong, growing from two to three feet high, producing an abundance of mammoth Double Flowers measuring from four to five inches in diameter on long stocks clear of foliage, making them very desirable as cut flowers as well as for garden decoration. Its love for the hot sunshine makes it admirably adapted to our summers. If planted in good soil in the open and given plenty of water, it will surpass any other flower for size and grandeur.

We offer the separate colors in the following varieties:

EXQUISITE—A most pleasing shade of light rose with center of deep rose. Exquisite is really well named. (Special Packet, 25c).

OLD ROSE—This is adequately described by its name as it is of the real old rose shade. It is very large and for charm and beauty it is very noticeable. (Special Packets, 25c).

GOLDEN STATE—A very rich orange yellow, yellow in the bud turning to an attractive orange when in full bloom. (Special Packet, 25c).

CRIMSON MONARCH—By far the largest and best of all red shades. Flowers are often eight inches in diameter; plants are very vigorous; a marvelous production of extraordinary merit. (Special Packet, 25c).

DREAM—A fine deep lavender turning to purple as the flower ages. A new and very desirable shade. (Special Packet, 25c).

POLAR BEAR—A very large pure white variety. This is the purest white every produced in Zinnias and of true Dahlia form. (Special Packet, 25c).

CANARY YELLOW—A delicate shade of creamy primrose yellow. Very large and holds its color well until out of bloom.

NEW GIANT DAHLIA FLOWERED ZINNIA—MIXED COLORS—Our mixture includes all of the above varieties and many others of the New Giant Dahlia Flowered type. This is the very finest Zinnia mixture and sure to please the most exacting flower lover.

(Special Packet—each, 15c).

See page 75)

PLANT OUR SPECIAL GIANT ZINNIAS

In offering these giant Zinnias we have no hesitancy in stating that they are the finest ever. We have actually grown flowers that measured $6\frac{1}{2}$ inches across, and they were beauties too. Immense flowers of wonderful colors and with long stiff stems making them excellent for cut flowers. The Zinnia is strictly a hot weather plant and will grow and bloom the entire

Summer, no matter how warm the climate. They are just the thing for Arizona climatic conditions, blooming at a time when flowers are scarce. We know you will be pleased with these, and we urge you to include them in your collection for the Summer flower garden. Begin planting in March and continue planting throughout the entire Summer.

IMPORTANT!

To produce the best in Zinnias as to size and color the plants should be thinned to at least 6 inches apart. Avoid shade, give plenty of water, and good soil and cultivation will do the rest.

GIANT PICOTEE MIXED

This Zinnia is in a class by itself. In addition to its being double and large flowered, each petal is distinctly tipped with a darker shade of the same color, making it novel and attractive. (Special Packet, 25c).

GIANT VICTORY QUILLED MIXED

The flowers are very large, with velvety quilled petals. The plants are vigorous and well branched. (Special Packet, 25c).

GIANT BUTTER CUPS

A very pleasing shade of creamy yellow. Intermingled with other colors or by itself, it is bright and pretty. The flowers are large and double. (Special Packet, 25c).

SEPARATE COLORS DOUBLE GIANT ZINNIA

Every flower a picture and a study by itself. You will be very proud of them. Our improved strains are absolutely the best obtainable.

A deep Cream, undoubtedly the best Cream Spencer grown, beautifully waved large flowers.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

ELFRIDA PEARSON

Giant Blush Pink, a great favorite. The color is a lovely pink throughout, the buds and flowers being tinted with Salmon Pink.

(Pkt. 10c), (oz. 40c), (¼ lb. \$1.40)

The new and improved strains of Sweet Peas make their culture a pleasure indeed, and those failing to plant will only regret it when blooming time comes. They are of easy culture and no garden is complete without them.

Select your space in the open, where the vines may be trained on a trellis, and dig a trench about two feet wide and eighteen inches deep. Put about three inches of well-rotted barnyard manure in the bottom of the trench, mix a sprinkle of manure and commercial fertilizer with the dirt that has been removed and replace it. Open a trench across the bed about six inches deep and plant one ounce of seed to 15 feet of drill in the bottom of it, covering the seed about one inch. Now fill this last trench with water and soak thoroughly, following with a sprinkle of fine manure to prevent the surface crusting.

After the peas are up eight or ten inches begin to draw the dirt to them, gradually filling the planted trench and opening another trench about ten inches from the row through which to water them the rest of the season.

Frequent cultivation is very necessary, and after the peas are 12 to 15 inches high a mulch of fine manure should be applied to the entire bed and gradually worked into the soil. Keep them well watered, and at blooming time they should be cut each day to insure a long blooming period.

DEFIANCE

This is a really worth-while addition to the Orange-Scarlet class. The flowers are of excellent form and immense size. They are borne freely and usually carried in fours. The color is a rich dazzling Scarlet of a startling richness.

(Pkt. 10c), (oz. 40c), (¼ lb. \$1.25)

POWERSCOURT

A pure Lavender self with flowers of mammoth size, yet refined and well placed on long stems. Of vigorous habit and free flowering. We recommend this as one of the best of all Lavenders.

(Pkt. 10c), (oz. 40c), (¼ lb. \$1.25)

HELEN LEWIS

A very large Orange Pink. The wings are of orange and the standard of intense rich crimson orange.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

KING EDWARD SPENCER

The best Red Sweet Pea grown; deep rich Carmine Scarlet. The wings are also Carmine Scarlet and on reverse side deep Rosy Carmine.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

PICTURE

This is as big as anything we have in Sweet Peas. The flowers are well waved and exquisitely frilled. The color is a blend of Cream and Pink shades, having a deeper flush on the wings. A strong grower, carrying four large flowers to a stem.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

BUY THE BEST—WE DO

Inoculate your Sweet Pea Seed with

ROYAL PURPLE

A rich, warm Purple; what we consider the best purple for our climatic conditions.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

HAWLMARK PINK

This most beautiful Sweet Pea is unsurpassed for either exhibition or general cutting purposes. The color is a most beautiful shade of rich Rose-Pink, deeply flushed and shaded with Salmon. The wings are bright Rose-Pink, whereas the standard is somewhat lighter in color and slightly toned down with salmon. Large well-waved blooms.

(Pkt. 10c), (oz. 40c), (¼ lb. \$1.25)

MASTERPIECE

Large, wavy, Lavender-tinted Mauve.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50).

OTHELLO

Deep Maroon, very large.

(Pkt. 10c), (oz. 40c), (¼ lb. \$1.25)

ROSABELLE

A beautiful deep Rose with white blotch at the base of the standard and wings. The flowers are unusually large, of fine substance and well placed on long stems.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

MRS. TOM JONES

Bright Delphinium-Blue. The flowers are very large and of great substance; beautifully waved, and usually borne four on a stem of great length. A first-class rich blue.

(Pkt. 10c), (oz. 50c), (¼ lb. \$1.50)

EARLY OR WINTER FLOWERING SPENCER SWEET PEAS

These are sometimes called Winter Flowering and also Christmas Flowering. The growers class them as early flowering because when planted at the same time as the lates (standards) they will flower at least a month earlier. Because of the early tendency, if planted in October they may be brought into bloom in the late winter, and for this reason they have been called Christmas Sweet Peas. The varieties selected have long stems with three and four blooms to a stem.

EARLY AVIATOR

Large Crimson.

EARLY MEADOW LARK

Deep rich Cream, waved.

EARLY ROSE QUEEN

Large Rose Pink.

EARLY HARMONY

Giant Lavender; good florist variety.

AMETHYST

An early flowering "Royal Purple."

EARLY COLUMBIA

Large Pink and White.

SNOWSTORM IMPROVED

Flowers large, pure White, of great substance.

EARLY GLITTERS

Bright Orange Scarlet.

ZVOLANEK'S ROSE

A giant Rose-Pink.

BLUE BIRD

A magnificent Violet-Blue.

The above:

(Pkt. 15c), (oz. 50c), (¼ lb. \$2.00).

GIANT EARLY FLOWERING

SPENCER—Mixed:

(Pkt. 15c), (oz. 45c), (¼ lb. \$1.75)

ANTIGONON LEPTOPUS

PLANT IN JANUARY, FEBRUARY AND MARCH—ORDER EARLY

A Beautiful Permanent Vine, Bearing Lovely Shell Pink Blossoms

Antigonon Leptopus—(Queen's Wreath)—Admirably adapted to our climate in the Salt River Valley. Grows an immense vine early, kills down by frost, and grows the following Spring from the roots. They are being planted quite extensively in the Valley and excite no end of comment during September and October, when they are covered with a mass of beautiful pink blossoms.

(Medium size tubers, per clump, 50c), (Large tubers, per clump, 75c).

FLOWER SEEDS

MAMMOTH VERBENAS

A hardy perennial of trailing habit and one of the finest and best known for beds, parkings, etc. The colors are brilliant and varied and the new large flowered strains are handsome as cut flowers. The flowers are fragrant and produce freely throughout most of the year. They will stand much neglect after established. Although perennials, they will bloom the first season from the seed.

MAMMOTH SCARLET—The flowers are an intense fiery red, produced in great clusters, and is recommended above all others as a bedding variety. (Pkt. 10c), (¼ oz. 40c).

MAMMOTH LAVENDER—A giant flowering sort, bearing clusters of beautiful purple flowers. (Pkt. 10c), (¼ oz. 40c).

MAMMOTH PINK—Unexcelled for size and beauty. (Pkt. 10c). (¼ oz. 40c).

MAMMOTH WHITE—(Pkt. 10c), (¼ oz. 40c).

MAMMOTH MIXED—Embracing all sorts. Unsurpassed for richness of color and profusion of bloom. The very richest mixture procurable. (Pkt. 10c), (¼ oz. 40c).

VIOLET

Single sweet-scented. (Pkt. 25c).

WALLFLOWER

These delightfully fragrant flowers are indispensable for every garden. Plant in October. (Pkt. 10c).

SCABIOSA

(Mourning Bride)

Planted here in the Fall, tall bushes are obtained, bearing a mass of lovely flowers in rich colors. (Pkt. 10c), (oz. 50c).

GIANT STOCKS

STOCKS

A very popular plant in Southern Arizona. For brilliancy, fragrance and duration of bloom it is unsurpassed; plant from September to December.

Stocks have been greatly improved by selection, and our strains, which are raised by expert growers, give fully 60 per cent of double flowers. There always will be some single plants, as those are the only ones which bear seed, and the plants should be set out in the garden sufficiently close for these single ones to be pulled up when they show their first flower, and still leave plenty of fine double plants. Stocks are of easy culture, are a long time in bloom, are hardy, very beautiful and satisfactory.

GIANT PINK—Delicate flesh pink spikes of double flowers. (Pkt. 15c), (1-8 oz. 75c).

GIANT CRIMSON—Long spikes of a rich crimson color. (Pkt. 15c), (1-8 oz. 75c).

GIANT WHITE—A double variety about two feet high. (Pkt. 15c), (1-8 oz. 75c).

GIANT LAVENDER—Light lilac, shading deeper at bottom of petals and lighter on the new flowers. (Pkt. 15c), (1-8 oz. 75c).

GIANT MIXED—A choice selection of many colors. All large flowering varieties. (Pkt. 15c), (1-8 oz. 50c).

SUNFLOWER

CALIFORNIA DOUBLE—Large, massive, bright yellow flowers. (Pkt. 10c).

NEW RED SUNFLOWER is a very apt description of this new variety. The plant is of freely-branching habit, with well-shaped dark-centered flowers of bright chestnut red, merging to yellow at the tips of the petals. Height, 8 feet. (Pkt. 10c).

BUY THE BEST—WE DO

(Calcium Cyanide will kill ants
See page 75)

New Mexican Ever Blooming Tuberose

PRETTY AND FRAGRANT

Originated in Mexico, where it is grown to perfection under tropical conditions. They have long stiff stems, pure white single flowers, and are delightfully fragrant. They withstand the hot sun, begin blooming in July, and continue until frost. They may be cut when the first flower opens and they will keep for a week or ten days. Single bulbs planted soon become clusters of bulbs, until they become so thick it is necessary to thin and transplant them. We can supply bulbs from January first to June first, and we earnestly recommend them to our customers for garden display or cut flowers.

Each 10c, dozen \$1.00

FLOWERING PLANTS, BULBS AND VINES

NOTICE

The prices on these items are postpaid, unless otherwise noted, and they will be sent as soon as the plants are large enough for shipping; or in case of bulbs, in their proper season.

CALLA LILY

Requires rich soil and a shaded location. Medium size bulbs, Each 25c; Large size bulbs, Each 35c.

MADEIRA VINE TUBERS

A well-known climber with white flowers and foliage of waxy appearance. Large size bulbs. (Each 10c), (3 for 25c).

CALADIUM BULBS

Require rich, moist soil and a shaded location. Very large bulbs. (Each 30c).

GLADIOLUS

Plant more Gladiolus. They are very easily grown and you will be more than repaid for your time and money expended with the beauty and charm of this wonderful flower. They make a wonderful showing in any location and as a cut flower it is the most useful of all spring flowering bulbs. Our bulbs are ready in October and may be planted any time during the fall, winter and spring months. Mixed Colors. (Each 10c), (dozen \$1.00).

CANNA BULBS

NEW VARIETIES WITH LARGER FLOWERS AND MORE OF THEM

In no other flower has there been such a rapid development. For Arizona and New Mexico they are the finest bedding plant we have. Flowers are of great size and of lovely shape, rivaling orchids in outline and coloring. Plant in a warm soil, with plenty of water and in a half shaded location. Mixed colors. (Each 20c), (\$1.75 dozen).

HONEYSUCKLE

HALL'S JAPAN

A vigorous, evergreen climber. Flowers white, changing to yellow. Very fragrant. (Each 75c).

VIRGINIA CREEPER

One of the most valuable of climbing vines. Once the plants are well started and firmly rooted they thrive with but little water and care. Leaves are large and green, changing to a brilliant scarlet in the Fall. (Each 50c).

MOON FLOWER VINE

We grow these in pots and can supply them about March 1st. (Each 35c).

If you enjoy our catalog, please tell your friends. A card will bring it to them free of charge.

BUY THE BEST—WE DO

BUSH ROSES

If wanted by mail, add 3c per bush for postage. Express shipments will allow for more packing around the roots and we suggest having them expressed rather than mailed.

Our roses are field grown, budded and own root stock, and are usually ready for shipment by January 15. We list here those varieties which have proven most successful under our soil and climatic conditions.

In setting out roses a hole should be dug at least one foot in depth and 15 inches wide for each plant; the roots should be carefully spread out and covered with fine soil; manure should

never be placed in actual contact with the roots, but near at hand, within reach of the new feeding roots when growth begins. The remaining soil should then be packed in firmly, the surface leveled and covered with about three inches of pulverized manure and straw. In selecting your varieties, please add to the order a few supplementary varieties lest by previous orders the stock of any particular one should be exhausted.

SPECIAL NOTICE—IMPORTANT

Place your orders for Roses early in the season, as certain varieties become scarce as the season advances owing to the popular demand.

Please state in your order if it will be satisfactory with you for us to substitute varieties if we cannot supply what you order. If

you fail to state "No substitution," we will use our best judgment in selecting varieties for you, or if you want only the varieties you order, we reserve the right to refund the money sent if our supply is exhausted.

BELLE SIEBRECHT

A magnificent rose of bright deep pink. Flowers are extra large and well formed, the buds being especially beautiful. A free and constant bloomer. (Each 75c).

LA FRANCE

A superb standard variety of a delicate silvery rose changing to silvery pink. The flower is very large, full and globular form. (Each 75c).

LADY HILLINGDON

This is the yellow rose for the coming years. The foliage is beautiful and the slender deep rich yellow buds are borne on long willowy stems. (Each \$1.00).

ULRICH BRUNNER

Rich, glowing scarlet crimson flowers of exquisite form, borne on very large stiff stems. The buds are perfect in outline and color. (Each 60c), (doz. \$6.00).

SUNBURST

A rose true to name which is creating a great sensation. The color is orange copper or a blended golden orange and golden yellow shaded lighter at the edges of the petals. Its long pointed buds, which may be cut tight for market, puts it in a class with the American Beauty. (Each \$1.00).

AMERICAN BEAUTY—The world-famous rose. Magnificent buds. Flowers extra large and deep petals, beautiful form and very double. Rich rosy crimson. (Each, 65c), (doz., \$6.50).

JONKHEER J. L. MOCK. H. T.

One of the best bedding and cutting varieties. The flowers produced with the greatest freedom on long stiff stems, and of large size and perfect form; a deep imperial pink in color, the outside of each of the petals being silvery rose white. (Each 75c).

PREMIER. H. T.

In the entire range of dark pink roses, there is none handsomer than this fine variety. The color, a deep, rose pink, the perfect form of the flower, the ample foliage, and the unsurpassed fragrance, all combine to make it an excellent all-round rose for bedding or cutting. Almost thornless, splendid, stiff stems. (Each 75c).

MME. EDOUARD HERRIOT

MME. EDOUARD HERRIOT

Very popular because of its wonderful freedom of bloom and fascinating color. In the bud it is a coral shaded with yellow and bright rosy scarlet passing to a shrimp red. (Each \$1.00).

LOS ANGELES, H. T.

One of the finest roses ever introduced. The growth is very vigorous, and produces a long-stemmed flower of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. The buds are long and pointed. ((Each \$1.00).

MAMAN COCHET

White. A handsome creamy white rose, outer petals tinged with pink. The large perfect buds and mammoth flowers are produced on splendid stems, and are of excellent quality for cutting. (Each 75c).

When unable to fill orders as specified we will substitute the nearest variety unless a second choice is included or we are instructed not to substitute.

BUY THE BEST—WE DO

(See page 71 for Pruning Shears)

BUSH ROSES

BRIDE

An ever-blooming pure white Tea Rose of large size and perfect form. (Each 75c).

BLACK PRINCE

Splendid dark crimson flowers, very globular and good. A strong grower, a good Spring and Fall bloomer, and a general favorite. (Each 75c).

HADLEY. H. T.

Brilliant rich crimson, a color retained all the year round. Borne on stiff, upright stems, and intensely fragrant. A well known variety and one of the best garden roses of its color. (Each 75c).

DUCHESS OF ALBANY

A lovely shaded deep rose, quite commonly called "The Red La France." (Each 75c).

EDWARD MAWLEY

Velvet crimson of a deep rich color on huge petals beautifully arranged. (Each 75c).

ETOIL DE FRANCE

A lovely shade of clear velvety crimson. (Each 75c).

ETOIL DE LYON

No better yellow bedder. Blooms freely and every flower is a gem. (Each 75c).

FRAU KARL DRUSCHKI

The white American Beauty. An everywhere hardy, vigorous grower, with bright green leaves. (Each 75c).

MAD. ABEL CHATENAY

A very beautiful rose of novel and distinct color, being a cream rose color shaded with rose vermillion and tinged with salmon. The base of the petals are highly colored. A very valuable rose as a cut flower sort. (Each 75c).

MAD. CAROLINE TESTOUT

This clear pink rose is very large, double and sweet, resembling a La France. Free flowering and highly recommended. (Each 75c).

OPHELIA. H. T.

Color is salmon flesh, shaded with rose. Buds large and of absolutely perfect form with flowers produced in profusion on long stiff stems. Growth vigorous. A fine, very popular rose. (Each 75c).

METEOR

This rich dark crimson rose is becoming more popular every year because of its rich color, and its excellent properties as a cut flower. (Each 75c).

MLLE. CECIL BRUNNER

A dainty little gem, rosy pink on a rich creamy white ground. Borne in large open clusters. (Each 75c).

PAPA GONTIER

Rich carmine flush crimson, with silken texture. A delightfully fragrant and splendid grower. (Each 75c).

PAUL NEYRON

The largest of all roses, with an immense deep shining rose-colored flower, free blooming; very fine and showy. (Each 75c).

RAINBOW

A pretty striped variety resembling Papa Gontier in color, it being a lovely shade of carmine, striped in a most unique manner with intense crimson. (Each 75c, (doz. \$7.50).

SOUVENIR DE PIERRE NOTTING

Beautiful yellow rose flushed light peach; flowers very large, well filled, and open, full and perfect. Buds are long, pointed and very fragrant. (Each 75c).

GRUSS AN TEPLITZ

Hardy in all sections; vivid, dazzling, fiery crimson; produces a mass of bloom. (Each 75c).

GENERAL JACQUEMINOT

A celebrated and much sought after variety; shapely buds and handsome blossoms of bright shining crimson. (Each 75c).

LADY BATTERSEA

GENERAL McARTHUR

A brilliant scarlet; bright rose color of good size, and double, of remarkably strong growth, upright and symmetrical. We recommend this as one best scarlets for bedding or for cut flowers. (Each 75c).

HELEN GOULD

An attractive rosy crimson. Buds exquisitely formed, long and pointed. Blooms large and full. (Each 75c).

PINK KILLARNEY

Immense long pointed buds, and massive flowers on big heavy stems. Petals frequently 2½ inches deep. The color is deep, brilliant and sparkling shell pink of the most exquisite shade. (Each 75c).

LADY BATTERSEA

A beautiful cherry crimson, permeated with an orange shade, becoming much darker in the Fall and Winter. (Each 75c).

KAISERIN AUGUSTA VICTORIA

Pure white, splendid large buds and full double blossoms making the choicest cut flowers. (Each 75c).

LA DETROIT

A shell pink shading to a soft rose. Flowers large, beautifully formed and handsome both in bud and full bloom. An excellent rose for this climate. (Each 75c).

CLIMBING ROSES

CLIMBING AMERICAN BEAUTY

The ever-popular American Beauty Rose with the addition of the climbing habit has proved hardy and capable of standing heat and drouth. (Each 75c).

CLIMBING KAISERIN

CLIMBING SUNBURST

Flowers are identical in form with the bush variety and the vine is a strong grower. (Each \$1.00).

MARECHAL NIEL

Climbs to a great height and yields beautiful golden-yellow buds and blooms in rich profusion. (Each \$1.00).

CLIMBING GRUS AN TEPLITZ

A perfect sheet of crimson when in bloom. It's the same as the bush Teplitz. (Each 75c).

CLIMBING HOOSIER BEAUTY

Deep crimson with darker shadings just like the bush variety and is strong and vigorous. We believe this is one of the very best Hybrid Tea climbers ever produced. (Each 75c).

CLIMBING ETOILE DE FRANCE

Very vigorous. Always in flower throughout the heat of summer and undoubtedly the best hot-climate climber on the list. (Each 75c).

CLIMBING GEN. McARTHUR

True sport from the popular bush variety and destined to be a very desirable red climber. (Each 75c).

CLIMBING KAISERIN

Pure white, shaded at base of petals to primrose. (Each 75c).

CLIMBING PAPA GONTIER

Rosy-crimson, fine, long bud; free and strong. (Each 75c).

CLIMBING YELLOW CECILE BRUNNER

Polyantha. A sport from the well-known Cecile Brunner. The flowers are the same except that they are an apricot yellow instead of pink. (Each 75c).

CLIMBING PINK MAMAN COCHET, T.

Light pink, shaded with salmon-yellow and outer petals splashed rose. Large and full. Fine to cut. (Each 75c).

CLIMBING LADY HILLINGDON

Deep orange-yellow, good size, long and pointed bud; excellent for cutting. (Each \$1.00).

CLIMBING WHITE MAMAN COCHET, T.

Cream-white, with edges flushed rose. Otherwise same as the Pink from which it is a sport. (Each 75c).

CLIMBING SILVER MOON

Pure white with clear yellow stamens, large, free. Glossy bronze-green foliage. (Each 75c).

CLIMBING WM. A. RICHARDSON

Copper-yellow, flushed carmine. One of the very popular yellow climbing varieties. (Each \$1.00).

PAUL'S SCARLET CLIMBER

This wonderful new climbing rose possesses a brilliancy of color unequalled in any other variety. The flowers are an intense vivid scarlet, semi-double and are very freely produced in clusters of from 3 to 20 blooms on long much branched canes, the plant being a mass of color from top to bottom. The flowers do not fade but maintain their color until the petals fall. It is a strong grower and for pergola, pillars or other purposes there is nothing to compare with it for a striking effect. (Each \$1.00).

CLIMBING CAROLINE TESTOUT

A strong grower with foliage and flowers same as the bush from which it is a sport. (Each 75c).

CLIMBING PINK CECIL BRUNNER

One of the strongest growing roses, style of foliage and color same as the bush. (Each 75c).

CLIMBING BELLE SIEBRECHT

Imperial pink, large and beautifully formed. Very prolific bloomer and with sweet fragrance. (Each 75c).

CLIMBING SOUV. DE WOOTON

A rampant climber with deep, crimson flowers of large size. (Each 75c).

CLIMBING DOROTHY PERKINS

Beautiful deep pink. We recommend this as one of the best climbers for Arizona. (Each 75c).

CRIMSON RABMLER

Too well-known to need description. (Each 75c).

CHEROKEE PINK

About the same in form and size as White Cherokee. Color bright, clear pink. (Each 75c).

CHEROKEE SINGLE WHITE

Foliage quite distinct—a valuable feature of the plant. Glossy, green, smooth surface, always clean. Flowers large, clear white, with bright yellow stamens. (Each 75c).

FRUIT TREES

In ordering Trees, state on the order blank if we may substitute the next nearest variety if we are out of the one you order. Write for quantity prices.

DELICIOUS APPLE

APPLES

Prices—85c each, \$8.00 per 10

Add 10c per tree if wanted by parcel post

GRAVENSTEIN—Large yellow marked with red and orange; flesh tender, juicy and highly flavored. Ripens in August.

DELICIOUS—A magnificent new variety, of fine appearance and delightful flavor; brilliant red; of large size, rather conical in form. Tree has good, strong habit of growth and excellent bearing qualities.

RED ASTRACHAN—Large deep crimson, flesh white, crisp, juicy, rather acid. Ripens July and August.

WHITE WINTER PEARMAIN—Commercial Winter variety. Pale yellow, with yellowish crisp flesh; juicy, with a fine sub-acid flavor. Ripens in November.

TRANSCENDANT CRAB—A large golden yellow with rich crimson tint. Ripens in September.

PEACHES—FREESTONE

Prices—85c each, \$8.00 per 10

Add 10c per tree if wanted by parcel post

ELBERTA—Large yellow with red cheeks. Unexcelled for table use. Ripens in August.

FOSTER—Fruit large yellow, red on cheek, flesh yellow, very rich. Ripens in July.

KRUMMELS—A very fine flavored peach, ripening in October. Large, juicy and sugary.

SALWAY—Equal to Elberta in size and flavor. One of the best for Arizona. Ripens in September.

J. H. HALE—The experiments of the past several years have demonstrated that this is a profitable variety for the peach grower. It is a freestone of large size—Elberta type—highly colored; yellow flesh, red around the pit, which disappears in canning; almost as firm as a cling yet tender and good for eating; ships exceedingly well; remains on trees in firm condition for longer time than any other freestone; bears well and commands high price. Ripens with Elberta. August.

EARLY CRAWFORD—Has all the good qualities of the Late Crawford. Ripens in August and September.

SALWAY PEACH

PEACHES—CLING

Prices—85c each, \$8.00 per 10

Add 10c per tree if wanted by parcel post

PHILLIPS CLING—Fine large yellow, flesh firm and yellow to pit. Ripens in September.

TUSCAN—Very large, pure yellow to stone. Ripens in July.

WHITE HEATH—Very large, white with light shade of red. Ripens in September.

ORANGE CLING—Large yellow with dark crimson cheek. Flesh golden yellow. Ripens early in August.

LEMON CLING—Large lemon-shape, deep yellow with red cheek; flesh firm and rather acid. Ripens in August.

APRICOTS

Prices—85c each, \$8.00 per 10

Add 10c per tree if wanted by parcel post

NEW CASTLE—Medium size, round, fine flavor, a good shipper. One of the best early varieties. Ripens June 1st.

MOOR PARK—Large greenish yellow, shading to red on sunny side. Fruit is of highest quality. Excellent as a combination shade and fruit tree. Ripens in August.

ROYAL—Medium size, skin dull yellow, slightly tinged with red. Excellent for canning and drying. Ripens in July.

ARIZONA ASH

DECIDUOUS AND EVERGREEN SHRUBS

We recommend shipment by express.

ALTHEA (Rose of Sharon)—These are the most beautiful shrubs we have to offer. They bear flowers in great profusion and bloom freely from June to frost, when scarcely any other shrub is in bloom. \$1.00 and \$1.50 each.

EUONYMUS Japonicus—An evergreen of dense, upright growth; leaves dark, lustrous green. Very effective, and of easy culture. Balled, \$2.00 and \$3.00 each.

SPIRAEA VAN HOUTTEI (Bridal Wreath)—Charming garden shrub of moderate size. White flowers are borne in great profusion in the spring. 75c and \$1.00 each.

ARBORVITAE (Thuja)—One of the most beautiful, compact, ornamental shrubs. Suitable for cemeteries and in narrow corners of beds where slow growth is desired. Balled, 2 to 5 ft., \$2.00 to \$4.00 each.

CYPRESS, Arizona—Splendid native ornamental tree of pyramidal habit. Never damaged by frost. Foliage bluish green. Balled, \$1.50 to \$6.00 each.

CYPRESS, Italian or Pillar—This is a favorite for planting in cemeteries, or at the entrance of driveways or walks. Branches are erect and grow close to the trunk. Foliage dark green. Balled, 3 to 5 ft., \$2.00 to \$6.00 each.

EUCALYPTUS, rudis (Desert Gum)—This is the most used variety and very valuable for arid regions; in fact, it is unsurpassed by any other variety for withstanding heat, cold or wind. Attains a height of 100 feet. 75c, \$1.00 and \$1.50 each.

POMEGRANATE, Flowering—Very handsome shrub with shining green leaves and large, double, red or white flowers. 75c and \$1.00 each.

ARIZONA ASH

Considered the most satisfactory shade tree for Southern Arizona. While it is not of rapid growth, it seems better adapted to our soil and climatic conditions than most others. We have no hesitation in recommending this as our best shade tree.

TEXAS UMBRELLA

The Umbrella forms a symmetrical round head. As a quick grower it has become very popular in arid and semi-arid regions.

POPLAR, CAROLINA

An upright-growing tree, with pyramidal head; very large, glossy, deep green leaves. A rapid grower and a very popular variety for street planting.

POPLAR—BALM OF GILEAD

This tree differs from the other Poplars in that it has a large, spreading head and leaves, making it quite useful for shade.

LOCUST, BLACK

This is a quick-growing, hardy tree, which blooms freely during the Spring months. Very suitable for this section of the country.

MULBERRY, RUSSIAN

This is the best Mulberry for shade. Has large leaves, a spreading head, is very hardy and quick growing. Very drought-resistant.

FRUITLESS MULBERRY—10 ft. A good strong growing, dense shade tree with usual large mulberry leaves and with habit of growth the same as the fruiting variety, but bearing no fruit, thus avoiding the staining of walks or grounds under the tree. Excellent for Arizona conditions.

Include postage if wanted by Parcel Post

OLEANDER—This is a well-known and popular flowering shrub which does well in our climate. We have the best varieties, both double and single, in Red, White and Pink. \$1.00 to \$2.50 each.

PRIVET, Californica—Best of all hedge plants, with shining green foliage. Does well in our climate and deserves to be planted extensively wherever a hedge is desired.

1 year old—Each 20c; doz. \$2.00; 100 \$10.00
2 year old—Each 25c; doz. 2.50; 100 15.00
3 year old—Each 35c; doz. 3.00; 100 20.00

PEPPER TREE—One of the most attractive trees we have. It often grows to a height of 50 feet. The drooping, feathery foliage makes it one of the most beautiful of ornamental shade trees. 1-year old, \$1.00; 2-year, \$1.50. distinctive and dignified in appearance.

PALMS

PHOENIX Canariensis (Canary Island Palm)—This is easily the best Palm for general planting. Very appropriate as an ornament for the porch or other decoration, being a slow grower in pots or tubs. When given room in the ground it grows rapidly and forms a magnificent, spreading Palm, very distinctive and dignified in appearance. \$2.00 to \$6.00 each.

WASHINGTONIA Filifera (California Fan Palm)—Very hardy-growing Fan Palm. One of the best for this immediate vicinity on account of its ability to withstand much frost. Grows very rapidly. Balled, 2 to 3-year, \$2.00 to \$3.00 each.

(Ants are very destructive to Trees & Shrubs—Kill them with Calcium Cyanide—See page 75)

POULTRY AND STOCK FEEDS

We are selling the **CAPITOL BRAND** line only after careful consideration of all the manufactured feeds offered by the different mills in Arizona and elsewhere. We can recommend **CAPITOL BRAND** feeds as being the finest obtainable anywhere and offer them especially to those wanting quality feeds for the very highest results.

CAPITOL BRAND CHICK STARTING MASH WITH BUTTERMILK

Contains: Ground Oat Groats, Yellow Ground Corn, Shorts, Soy Bean Oil Meal, Bran, Dried Buttermilk, Bone Meal, Fish Meal, Charcoal, Calcium Carbonate, Salt.

For the correct starting of baby chicks on the road to health and proper development.

Baby chicks should not be fed for at least 72 hours after hatching and then very sparingly for the first few days.

Write or call for complete feeding directions.

Packed in 10-lb.—25-lb.—50-lb. and 100-lb. bags.

CAPITOL BRAND CHICK GRAIN

Mixed from the choicest of cracked and whole grains into a properly balanced grain ration. **CAPITOL BRAND CHICK GRAIN** should be fed with the chick starting mash for best results.

Contains: Cracked wheat, cracked corn grits, steel-cut oats, cracked maize and chick millet.

Packed in 10-lb.—25-lb.—50-lb. and 100-lb. bags.

CAPITOL BRAND DEVELOPING MASH

To be fed after your chicks have been properly started on chick mash and have reached the seventh or eighth week. For sturdy, healthy development **CAPITOL BRAND DEVELOPING MASH** cannot be excelled. It is a proper blend of those ingredients producing most efficiently bone muscle and feathers.

It is composed of: Reground wheat bran, yellow ground corn, ground oat groats, wheat shorts, alfalfa leaf and blossom meal, soy bean oil meal, dried buttermilk, linseed oil meal, bone meal, salt and the necessary poultry minerals.

Write or call in for complete chick feeding directions.

Packed in 25-lb.—50-lb.—100-lb. bags.

BUY THE BEST—WE DO

(Plant Chinese Cabbage or Swiss Chard for green feed)

CAPITOL BRAND DEVELOPING GRAIN

Fed in conjunction with the Developing Mash for the very best results and in amounts equal to that of the mash eaten. **CAPITOL BRAND DEVELOPING GRAIN** is a mixture of grains of the best quality obtainable, cracked and milled to the proper size for feeding until the time your chicks have been matured and are ready for whole grains.

The contents are: Cracked yellow corn grits, cracked maize, cracked wheat, oat groats, and cracked hulled barley. Packed in 25-lb.—50-lb.—100-lb. bags.

CAPITOL BRAND INTERMEDIATE DEVELOPING MASH

This mash is new to most chick raisers, but it has certainly filled a long-felt need. **CAPITOL BRAND INTERMEDIATE DEVELOPING MASH** is for use from the time your chicks are about four months old until they are ready for laying mash. It will give that proper development which prepares the pullet to go into high production when the feeding of laying mash is started. And furthermore, **CAPITOL BRAND INTERMEDIATE DEVELOPING MASH** is so much cheaper in price than developing mashes that the grower is enabled to get his pullets to production at a nominal cost.

It is composed of Wheat bran, shorts, yellow ground corn, ground oat groats, ground barley, alfalfa leaf and blossom meal, linseed meal, beef scrap, fish meal and poultry minerals.

Packed only in 100-lb. bags.

CAPITOL BRAND FATTENING FEED

Should be fed your cockerels which you must prepare for market as quickly as possible to eliminate feed costs. This feed is prepared especially to produce quick gains and to put the chicken in first-class marketable condition, firmly fleshed.

Hens and broilers fed on a good well-balanced crate feed will make wonderful gains in a very short time. For best results the feeds should be properly balanced so as to be easily digested.

Our fattening feed consists of Red Dog flour, oat meal, yellow corn meal and soy bean oil meal. Birds should never be over-fed. Start two times a day for the first two days, then three times each day for 7 to 14 days. Always mix feed with sour milk, using about one part of Semi-Solid Buttermilk to 7 parts of water.

CAPITOL BRAND LAYING MASH

Prepared and mixed with the greatest possible care to insure a high class feed to give the finest results in high egg production. **CAPITOL BRAND LAYING MASH** has met with wonderful success and the results from feeding this mash have been very gratifying to all users. In addition to producing eggs, it is made so that it acts as a conditioner to the flock and maintains it in a most healthy condition. In this connection let us advise you that a pullet properly developed and kept from laying until six months old will have a firmer, sounder bone; will be in better flesh, and will go through a hard winter with a higher egg production, without going into a fall moult.

Ingredients in our **CAPITOL BRAND LAYING MASH** are: Reground Wheat Bran, Wheat Shorts, Yellow Ground Corn, Ground Oats, Alfalfa Leaf and Blossom Meal, Meat Meal, Soy Bean Oil Meal, Dried Buttermilk, Cottonseed Meal, Linseed Oil Meal, Charcoal and Salt; with the necessary poultry minerals, such as Calcium Carbonate for bone and shell formation; Calcium Phosphate a bone and tissue builder; Sulphur, a blood purifier and conditioner; Sodium Sulphate, a laxative and regulator; Magnesium Sulphate, also a bowel regulator and cleanser; Sulphate of Iron, a blood builder.

Packed only in 100-lb. bags. Write or call in for complete feeding directions.

CAPITOL BRAND SCRATCH GRAIN

Grain in a properly balanced ration is absolutely necessary for high egg production fed in connection with a good Laying Mash, and for best results you must feed **CAPITOL BRAND SCRATCH GRAIN** balanced with your mash, as the two contain such elements as will form an equal number of whites and yolks of eggs.

The grains that go into our **SCRATCH GRAIN** are double re-cleaned and well mixed. The ingredients are: Wheat, Maize, Cracked Yellow Corn, Hulled Barley and Sunflower.

CAPITOL BRAND DAIRY FEED

Our **CAPITOL BRAND DAIRY FEED** has the proper amount of the right kind of Proteins from Linseed Meal and Cottonseed Meal. Carbohydrates are from Corn Meal, Ground Barley, Ground Oats and Bran.

Variations should be made to suit different conditions. Our Dairy Feed contains: Ground Barley, Bran, Yellow Corn Meal, Ground Oats, Cottonseed Meal, Linseed Oil Meal, Salt. It contains in addition a stock tonic with the following ingredients: Sodium Sulphate, Magnesium Sulphate, Sulphate of Iron, Sodium Chloride, Calcium Carbonate and Calcium Phosphate.

CAPITOL BRAND RABBIT FEED

For quick gains and healthy rabbits feed this new ration, which is composed of Alfalfa Leaf and Blossom Meal, Yellow Corn Meal, Ground Barley and Soy Bean Oil Meal.

CAPITOL BRAND PIGEON FEED

Pigeons like chickens must be fed a well-balanced feed to obtain best results. Our feed contains all the necessary ingredients: Milo, Canadian Peas, Hemp, Yellow Corn, Millet and Wheat.

CHARTERS INCUBATOR

It is the only machine that hatches as well in a frame building as in the best incubator cellar. This is made possible by the double temperature control—an inside and outside thermostat.

Other outstanding features of the CHARTERS INCUBATOR are:

- 1—Trim the wick once a week only.
- 2—Fill the lamp once a week only.
- 3—Outside Thermostat takes care of outside changes of temperature.
- 4—Special Process for retaining moisture.
- 5—Charters Burner and big tank reduce the fire risk.
- 6—Flame control reduces oil consumption.

CHARTERS INCUBATORS are made with oil or electric heating plants and also with both.

Four Sizes Only:	Electric or Oil	Combination Oil and Electric
540-Egg size	\$90.00	\$105.00
405-Egg size	75.00	90.00
270-Egg size	65.00	80.00
135-Egg size	55.00	70.00

BUCKEYE COLONY BROODERS

THIS IS A NEW AND IMPROVED DESIGN OF BROODER STOVE

BUCKEYE COLONY BROODER

We have studied the Brooder Stove situation in this country for several years and have come to the conclusion that the coal burner is the most reliable and surely the most satisfactory stove for our climatic conditions. In the first place it is the most economical. We have proved by tests that the Buckeye Colony Brooder runs the season on less than half the expense of our oil-burning stoves. The great objection to a coal-burning brooder stove is the fact that it burns coal, but we have proven to our own satisfaction that the saving in fuel, the absolute reliability and the convenience of the Buckeye Colony Brooder make it easily the most desirable brooder stove. Brooding chicks in Arizona is a serious problem. So many folks think that because the sun shines seven days in the week in a moderate climate that it is not necessary to make elaborate preparations for brooding, but that idea is all wrong. A chick that gets chilled is a weakling, its growth is stunted and it is subject to white diarrhoea. On the other hand, if they are kept warm and growing, the loss is very much less and a strong, healthy brood is the result. The original investment in a brooder stove may seem large, but if one stops to think that the loss of 200 chicks in a season will probably cover the original investment and the equipment is still good for years to come. Good brooding is just as important as good hatching, and the Buckeye Colony Brooder will do the job right.

No. 117—350-Chick Capacity	\$18.50	No. 119—1000-Chick Capacity	\$28.50

PLANET JR. TOOLS

No. 157 Planet Jr. TWO-ROW SEEDER

No. 157—Two-Row Seeder

No. 12 Planet Jr. Double and Single Wheel Hoe

A Double and Single Wheel Hoe in one. Straddles crops till 20 inches high, then can be worked between the rows with one or two wheels.

The Hoes are wonderful weed killers and leave the ground almost clean.

Cultivator Teeth for deep or shallow work. Plows are valuable for opening furrows, covering or plowing to or from the crop.

Weight, 33 lbs.

Price, \$12.25, f. o. b. Phoenix

No. 12 Double and Single Wheel Hoe

No. 17 Single Wheel Hoe

No. 17 Planet Jr. Single Wheel Hoe

Light and durable—can be used by man, woman or boy. Will do all the cultivation in your garden in the easiest and quickest way. High, easy running steel wheel. They take the drudgery out of garden work and give bigger, better crops. Last a lifetime.

Price, \$8.75, f. o. b. Phoenix

This PLANET JR. combination is particularly adapted for use when planting on beds. The best results are obtained by using a small team in the alleys with the drills between, on the bed. This has become a very popular method in Arizona for lettuce, onions, etc.

The machine works equally well with a single horse in the alleys and the drills on either side of the furrow. This arrangement has proved satisfactory.

The drills are adjustable from 10 inches to 36 inches apart, although it is not likely that the narrow distances will be used when the machine is drawn by a horse.

The draft of this seeder is so light that one man can push it successfully, but for all-day planting, an additional man or boy pulling on the front practically eliminates the draft. Net weight, 100 pounds

Price, \$54.00.....f. o. b. Phoenix

No. 5 PLANET JR. HILL AND DRILL SEEDER

No. 5 is undoubtedly the best seeder we make for market gardeners, lettuce, beans and onion growers and other large planters. The style of construction is the same as in No. 3, the valuable mechanical features being common to both.

16½-inch steel driving wheel
Weight, packed, 51 lbs. Holds 5 quarts
\$22.25, f. o. b. Phoenix

BUY THE BEST—WE DO

Planet Jr. Garden Tools

PLANET JR. M. S. U. SEEDER

This Planet Jr. Seeder (double-row on one bed) is meeting a long felt want with the lettuce planters in the West. The sled seeder is especially adapted for planting on irrigated beds where lettuce, table beets and other row crops are grown. The sled runners working in the irrigation furrows force the planting in a straight double line on top of the beds, making cultivation with either one or two-row cultivators practical, which could not be done with crooked row seeding.

The all-steel sled attachment consists of double front draw bar assembly, which is adjustable for different height rows; yokes with compression springs for raising and lowering seeders; lifting arch with lever and braces complete.

The new M. S. U. Seeders have practically no cast parts to break; the entire frame is steel, and the cover wheel is made in two parts, being adjusted to rise and fall freely, or with a spring pressure. The new frame controls the depth, holds the drills in place and lifts the drills clear of the ground when making turns, all by the use of one lever.

Sled Attachment with 2 M. S. U. Units (weight each, 170 lbs.) Price \$55.75
Sled Attachment only (weight each, 42 lbs.) 14.25

Usually we sell the separate Units and the sleds are made by local mechanics.

Write us for Planet Jr. Catalogue, giving complete line of Seeders and Cultivators.

No. 4 BARREL PUMP

No. 4 Barrel Pump—This pump is made to fit in a barrel and has ample capacity for two lines of hose. May be put on a sled or wagon. We suggest 20 feet of hose for each line of Fog Nozzles. Complete with hose, extension rods, shut-off and nozzle, ready for use, \$19.00, f. o. b. Phoenix.

CONTINUOUS ATOMIZER—This pump operates continuously on the up and down stroke and throws a fine, misty spray. Will handle all solutions of insecticides. Capacity, 1 quart. Galvanized tank.

(85c each). By parcel post, 10c extra.

"MODOC" BUCKET PUMP

This pump is equipped with 3 feet of $\frac{1}{2}$ -inch five-ply pressure spray hose attached with clamps. This pump will throw a straight stream, handle whitewash and other spray liquids with the same nozzle, by simply turning the disc in nozzle. Guaranteed to have a larger capacity than any similar pump.

Price each, \$5.00, f. o. b. Phoenix.

HUDSON JUNIOR PUMP

The Hudson Junior is unsurpassed for the backyard garden. It is light enough for a boy or girl to handle, yet strong and sturdy enough for any man. Can also be fitted with an extension rod when spraying low lying crops, and to facilitate reaching the tops of fruit trees, bushes, etc.

Galvanized tank, 17 in. long, $6\frac{1}{2}$ in. diameter; capacity 2 $\frac{1}{2}$ gallons. Weight, 9 pounds.

Price, \$6.00 each, f. o. b. Phoenix.

FOG NOZZLE

Fog Nozzle — For use on the Perfection or any power pump. As its name indicates, it produces a fog spray; $\frac{1}{4}$ -inch connection. Angle or straight. (Each \$1.00, postpaid)

New Misty Sprayer—A general purpose sprayer for farm, stable or garden uses. Handles fly-oils, bug poisons and disinfectants. Has large, powerful pump. Lock seamed can. Made of heavy tin. Holds one quart. Price each, 75c, postpaid.

BUY THE BEST—WE DO

(Insure your crops by early spraying. See insecticides. . . . Page 74)

SPRAY PUMPS AND DUSTERS

IDEAL OUTFIT No. 31

This outfit is light, compact and easy to operate. The tank holds fifteen gallons, is mounted so that the liquid will not slop or spill, and in a way that makes it easy to handle. The pump spreads across the top of the tank and is held firmly in place by a thumb nut. It has the largest air chamber of any spray pump of corresponding size. This enables the operator to keep a uniform pressure at the nozzle.

Price \$42.50, f. o. b. Phoenix.

GARDEN HOSE

WINGFOOT—Guaranteed 2 years:
 $\frac{3}{4}$ -inch couplings. (25 ft. \$4.00), (50 ft. \$7.50), postpaid.

SPRAY HOSE

$\frac{3}{8}$ -inch

We have the special Good-Year moulded spray hose which will stand the high pressure necessary. Can supply this in any length. It doesn't pay to buy cheap spray hose.

Price per foot, 25c

DUSTING MACHINES

NICO DUSTER

THE IMPROVED POWDER DUSTER

It is easily recognized as the best powder duster on the market. The absence of all cogs and wheels insure it against breakage through hard usage. If you have from 1 to 100 acres of melons or vine crop to dust, it will pay you to use this Duster.

No. 3—Price complete, with extension pipe, as shown above, \$18.50, f. o. b. Phoenix.

No. 1—Smaller capacity than No. 3, \$13.50, f. o. b. Phoenix.

Dusting with the NICO GARDEN DUSTER.
 Quick, Clean and Easy to Apply—
 One Needed in Every Home

There is scarcely an urban or suburban home that does not pride itself of at least two or three small fruit trees or vegetable or flower garden. You are aware that it is impossible to raise quality produce without using the proper insecticide.

Nico Garden Dust and Dusters are very effective against the common pests which destroy the home gardens.

Nico Garden Duster, \$1.00 each—postpaid, \$1.10.

INSECTICIDES AND POISONS

Poisons cannot be sent by mail.

POISON MIXTURES—We will furnish on request formulas for any mixtures desired in combating insects and plant diseases. Write us fully regarding any difficulty you may be having and we will give you expert advice.

DUSTING WITH A NICO DUSTER

NICO DUST No. 5 contains 5% Black Leaf 40. (100-lb. drum, \$18.00).

NICO DUST No. 6 contains 6% Black Leaf 40. (100-lb. drum, \$21.00).

NICO DUST No. 10 contains 10% Black Leaf 40—Very effective. (5-lb. package, \$2.25), (25-lb. drum, \$8.50), (100-lb. drum, \$29.00).

ABOVE PRICES ALL F. O. B. PHOENIX
INSECTICIDE POISONS CANNOT BE SENT BY MAIL

NICO GARDEN DUST—Put up especially for the family garden for use on vegetables, small fruits, rose bushes, all vines and flowers, where there is a variety of pests to contend with, such as aphids, leaf hopper, red spider, etc. 1/2-lb. package, with sifter top, 50c, postpaid.

ARSENATE OF LEAD—The most effective of all insecticides for spraying purposes. Especially adapted for use on tender plants and foliage. (Lb. can, 60c), (4-lb. pkg., \$1.60).

FISH OIL SOAP—When used in connection with nicotine solutions it better enables the spray to stick to the foliage. (Lb. 25c), (10 lbs. \$2.00).

SHERWIN WILLIAMS FUNGI-BORDO (Bordeaux Mixture)

In powdered form, mixes perfectly with cold water. For peach, tomato and potato blight and all fungus diseases. Prevents and cures mildew on roses, peas, beans, grapes, etc.

Directions: Use seven to nine pounds to 50 gallons of water. Or seven to eight table-spoonfuls to one gallon of water. (1 lb. 50c), (5 lbs. \$2.00). Write for quantity price. Cannot be sent by mail.

SULPHUR—(Powdered)—(Lb. 15c), (10 lbs. \$1.25).

TOBACCO DUST—For green and black fly, plant lice, etc. Apply when foliage is moist. (Lb. 25c).

NICO DUST

INSURE YOUR CROPS with the intelligent use of **NICO DUST**. **NICO DUST** is a dry powder which, applied with a blower, affords a material saving in time, labor and expense. A trial will convince you that it is both effective and economical. Our best recommendation is the hundreds of repeat orders we receive each season for use in combatting Aphids on melon vines.

GENERAL DIRECTIONS FOR APPLYING

Do not wait until the pests become abundant because by that time great damage has been done. Get a good dusting machine and dust the plants thoroughly. Apply direct to infected portions of the plants. "**NICO DUST**" products are most powerful in warm, bright sunshine and should be applied when the air is still or disturbed only by a slight breeze. Dusting in the early morning gives the best results.

It is an extremely fine dust, and has greater power of penetration than the liquid spray. It gives off a strong nicotine gas or vapor which kills insects even when none of the dust actually reaches them. It is made especially to exterminate insects such as cabbage aphids, melon aphids, grape leaf hoppers, onion thrip, citrus thrip, and all plant lice.

NICO DUST is made in three strengths. Order by number and specify what pest you wish to combat.

(5-lb. package \$1.60), (25-lb. steel drum, \$5.50),

(5-lb. package, \$1.85), (25-lb. steel drum, \$6.00),

(5-lb. package, \$2.25), (25-lb. steel drum, \$7.50).

BLACK LEAF 40

A solution of nicotine sulphate containing 40 per cent nicotine. The most highly recommended spray for soft-bodied sucking insects, such as plant lice, thrips, leaf hoppers.

(Small bottle, 35c), (1/2-lb., \$1.25), (2-lb., \$3.50), (10-lb., \$13.50), by express or freight.

PARIS GREEN—The old reliable destroyer of all chewing insects, such as potato bugs, codling moth caterpillars, etc. (1/4-lb. 25c), (1/2-lb. 40c), (1-lb. 70c), (5 lbs. \$3.00).

GOPHER BANE—A very effective poisoned grain for gophers, field mice, etc. (Pkg. 50c),

BUY THE BEST—WE DO

BEST MONEY CAN BUY

BEST EARTH CAN PRODUCE

For Lawns, Flowers, Gardens, Shrubs, House Plants, Fields and Orchards

Book FREE—Tells just HOW

A 25-lb. bag covers a lawn space of 1200 square feet. Lasts a year or more.

A tablespoonful to hill of potatoes, tomatoes or ordinary rose bush means abundant flowers, crisp and early vegetables.

A teaspoonful for 6 to 8-inch potted plant. Ferns love it.

(2-lb. pkg., 50c), (25 lbs. in cotton bag, \$3.00). Postage extra.

COMMERCIAL FERTILIZERS

We are stocking a complete line of Fertilizers this season which are ready-prepared for use without the necessity of mixing. Some are listed as number fertilizers, the first numeral of which states the percentage of nitrogen it contains; the second, phosphoric acid; the third, potash. The mixed fertilizers with price, quantity to use, and the crops to use them on, are listed below:

Name	Crop	Price per ton	Amount per Acre
2-12-2	Cotton	\$75.00	250-350 lbs.
8- 8-4	Lettuce, Cabbage, Cauliflower	90.00	400-700 lbs.
6- 8-2	Strawberries, Onions, Spinach.....	75.00	400-700 lbs.
4- 8-5	Melons, Potatoes, Sweet Potatoes	75.00	500-800 lbs.
4- 9-2	Beets, Carrots, Radishes, All Bunch Crops	70.00	400-600 lbs.

The fertilizers listed above are only a part of the many mixed fertilizers we carry.

Complete information concerning fertilizers may be had by writing us or calling in to our store.

We also recommend fertilizers listed below, which are not mixed and known as simples:

FISH MEAL

A highly concentrated material composed of dried fish scrap. It is highly recommended by many gardeners as being ideal for lawn and garden growth. It is practically all available plant food and lasts a long time. (100 lbs., \$6.00; 50 lbs., \$3.25; 25 lbs., \$2.00; 5 lbs., 50c).

NITRATE OF SODA

Contains about 15 per cent nitrogen. It is a very quick acting fertilizer and best applied after plants are growing. Successfully used in forcing large flowers and beautiful green foliage. Apply in liquid form at the rate of $\frac{1}{2}$ oz. to 1 gallon of water.

(Lb. 15c), (10 lbs. 80c).

BONE MEAL FERTILIZER

White steamed, a finely ground material of high quality, useful for all crops, but especially for grass lands, fruit trees and flower beds.

(Lb. 10c), (5 lbs. 40c), (10 lbs. 70c), (100 lbs. \$6.00).

Add postage to above prices on Fertilizer when wanted by Parcel Post.

Write for Quantity Prices on Fertilizers.

BLOOD MEAL

Pure Dried Blood—This is a highly nitrogenous fertilizer, rich in plant food and an excellent material for increased growth and a profusion of flowers and fruit.

(Lb. 15c), (5 lbs. 60c), (10 lbs. \$1.00), (25 lbs. \$2.25), (100 lbs. \$8.00).

GYPSUM

A very high grade material, useful for correcting black alkali, loosening the heaviness of adobe and other heavy soils.

(10 lbs. 50c), (25 lbs. \$1.00), (50 lbs. \$1.65), (100 lbs. \$3.00).

HYDRATED LIME

Used to correct any acid conditions existing in the soil.

(Lb. 10c), (5 lbs. 30c), (10 lbs. 50c).

BIRD MANNA

For the basis of this preparation we are indebted to the canary breeders of the Hartz Mountains. They use a paste that keeps their birds in health and song and cures nearly all diseases. Bird Manna is now more widely known than any article ever prepared by bird dealers, solely upon making its merits known and having been tested. Bird Manna is put up in metal cases, secured by letters patent and is fastened to the cage wires, within easy reach of the bird.. Price, 15c each.

BUY THE BEST—WE DO

(Tell your friends to Write for our Catalog)

Our Vegetable Collections Save You Money!

You may wonder why we offer seeds in these collections at bargain prices. The first reason is that it encourages the use of a greater number of kinds of vegetables and promotes the use of a greater variety of vegetables in the gardens and on the table. Another reason is that during the winter months we have more time to assemble these collections and prepare them for mailing, so all that is necessary during our rush season is the addressing and stamping.

All varieties in these collections are tried and proven sorts and all packets are full size and contain the highest quality seed, the same as though you were buying each item separately. We can not allow any change in the collections and no seeds other than these collections will be sold at these reduced prices.
